An Introduction to Connecticut Farmers’ Markets

In Connecticut, the demand for farmers' markets is increasing and each year there are a number of requests to establish new ones. Many consumers would prefer to purchase fresh Connecticut Grown products if given the opportunity to do so. The purpose of this Reference Guide is to provide guidance for those who want to start a new market, expand an existing market, or participate in selling of goods.

The markets provide a benefit for farmers and consumers alike. For the consumer, farmers’ markets provide a variety of fresh products at a reasonable price, while creating a weekly community event. Consumers enjoy a wide selection of products while supporting local agriculture and meeting the farmers who grow their food. Farmers’ markets provide an opportunity for farmers to sell their crops and to market their farm to a wide audience.

Farmers’ markets are also affiliated with a program to provide seniors and women with children who are nutritionally at risk (Seniors/WIC Farmers' Market Nutrition Program). This provides access to fruits and vegetables, and increases the demand for CT Grown products. Participants receive vouchers that can be used at certified farmers’ markets. For more information, please see Nutrition Programs section of this guide.

Food safety is a concern in all aspects from farm to table. Farmers’ markets have become one stop shopping locations to purchase fresh, high-quality produce and other specialty items. It is important that farmers, vendors, and market masters be familiar and comply with the applicable food safety regulations at the farmers’ market. This manual provides a general overview of the most common requirements. Working cooperatively with your local health department and the appropriate state agencies early on in the process will assist vendors in providing safe and wholesome foods at the farmers’ market.

**Internal Cooking Temperatures:**

<table>
<thead>
<tr>
<th>Temperature</th>
<th>Duration</th>
</tr>
</thead>
<tbody>
<tr>
<td>130°F</td>
<td>121 minutes</td>
</tr>
<tr>
<td>140°F</td>
<td>12 minutes</td>
</tr>
<tr>
<td>145°F</td>
<td>3 minutes</td>
</tr>
</tbody>
</table>

**Shell Eggs, Fish, Meat (Including Pork):**

- 145°F: 15 seconds

**Ground or Comminuted Meat and Fish Products:**

- 145°F: 3 minutes
- 150°F: 1 minute
- 155°F: 15 seconds
- 158°F: Instantaneously

**Poultry, Ground or Comminuted Poultry:**

- Stuffed: Fish, Meat, Pasta, Poultry or Stuffing containing PHF ingredients:
  - 165°F: 15 seconds

---

**Cold and Hot Holding Temperatures:**

- 45°F or less or 140°F or more for all potentially hazardous foods except: whole beef and pork roasts which may be held hot at 130°F or above.

**Cooling Requirements:**

- Cooked Potentially Hazardous Food shall be cooled:
  - 140°F: ≤ 70°F, within 2 hours
  - 70°F: ≤ 45°F, within an additional 4 hours

**Reheating Temperatures:**

- Potentially Hazardous Food that is cooked, cooled, and refrigerated food that is prepared for immediate service in response to an individual consumer order may be served at any temperature.

---

**Classification of a Farmers’ Market**

- Will the market allow processed foods?
- Will there be food preparation on site?
- Will the market allow food samples to be given away?
- Is the off-site base of operations (where the food is stored or prepared) licensed and inspected by a regulatory agency, if applicable?

---

**Selling Food Products**

Some products sold at farmers’ markets can present a risk to consumers, depending on how the product is produced and sold. Each market master, in cooperation with the local health authority, should decide which products can and cannot be sold, provide a list of foods to be sold to the local health department, and include this information in the bylaws or rules for his or her market. Market masters must include the following:

- Will the market allow processed foods?
- Will there be food preparation on site?
- Will the market allow food samples to be given away?
- Is the off-site base of operations (where the food is stored or prepared) licensed and inspected by a regulatory agency, if applicable?

---

**Commissioner J. Robert Galvin, M.D., M.P.H., M.B.A.**

This document is intended as guidance only and should not be viewed as all-inclusive.

Market masters and vendors must contact the appropriate federal, state, and/or local agencies for compliance with all applicable laws and codes pertaining to their respective markets/booths.
Infected Food Handlers

All vendors who handle food should note that it is absolutely imperative that any person experiencing symptoms of nausea, vomiting, diarrhea, fever, sore throat, or jaundice, must be excluded from handling any food products, utensils, single service paper goods, or linens, unless authorized to do so by the regulatory agency. It is equally important that any person diagnosed with salmonellosis, shigellosis, E. coli infection, hepatitis A, or norovirus infection be excluded. If a food handler is living in a household with someone who has been diagnosed with these illnesses, he or she might also need to be excluded from food handling. Lesions on the hands or wrists, including boils, must be covered and protected with an impermeable cover and a single-use glove. A tight fitting bandage must be used on lesions located on other parts of the body.

Food Contact Surfaces

If utensils are used to chop, cut, trim, serve or otherwise process food in any way, they must be properly washed, rinsed, sanitized, and allowed to air dry after use or at least every four hours throughout the event, as approved by the local health department. This also applies to food-contact surfaces such as cutting boards or prep tables. Appropriate facilities to wash, rinse, and sanitize soiled utensils and other food contact surfaces must be available or an adequate supply of utensils, cutting boards, etc. must be provided for the full course of the event. To sanitize correctly, an approved sanitizer mixed at the appropriate concentration, equal to 50 ppm of chlorine must be available and located within the booth. Soiled equipment may be brought back to the approved base of operations for correct cleaning and sanitization.

Hand Washing Facilities

Hand washing is the best way to prevent the spread of disease. If a vendor is serving ready-to-eat foods, preparing foods on-site, or providing free samples of product, an approved handwashing facility will be required. Hand washing stations require potable running water, some form of hand cleaner (soap), disposable towels, and a waste container. Products such as hand sanitizers should not be used as a replacement for hand washing. When washing, vendors must wash their hands for at least 20 seconds. There is no set requirement for the number of hand washing stations required per person; however, the facilities must be accessible, unobstructed and convenient for use. The local health department will evaluate what is deemed adequate and provide guidance when necessary.

Approved Sources of Food

All food, including food ingredients used for the preparation of foods, demonstrations, and for sampling, must come from an approved source. NOTE: Unprocessed, whole, raw fruits and vegetables shall be wholesome, free from spoilage, and otherwise deemed safe for human consumption based on generally recognized industry standards.

Risky Foods

Certain types of food allow for the rapid and progressive growth of pathogens and are deemed “potentially hazardous foods.” Foods classified in this category include dairy products, meat poultry, seafood, shellfish, eggs, sliced melons, raw sprouts, cut tomatoes, tofu, and garlic-in-oil mixtures. These products must be kept at proper temperatures to keep consumers safe. Information on proper temperatures for these foods or products can be provided by the local health department.

Meat, poultry, dairy, egg products, and other potentially hazardous foods must always be transported to and from the market in facilities capable of maintaining the food at a temperature of 45°F or less.

Unless properly processed by commercial means, canned or jarred foods may pose a high risk of botulism. Such foods may include (but are not limited to) sauces, dressings, fruit butters, pickles, salsa, soup, and dps. All prepared and processed foods must be produced in a facility that is inspected by a regulatory agency to ensure safe preparation and handling practices. The only exemptions to this requirement are properly labeled jams, jellies, preserves, and maple syrup (CGS sec 21a-24b). All other prepared and processed foods to be sold at a farmers’ market must come from an approved source and must be prepared at an approved, inspected facility. These facilities can be commercial kitchens, inspected church kitchens, or other retail or wholesale food establishments. Each vendor should make arrangements with the appropriate personnel to use these facilities. Private kitchens cannot be used for processing or preparing foods.

Food that is prepared for immediate consumption at the market must also be prepared using safe food handling procedures, in conformance with regulations. Cutting produce, preparing samples for consumers, and preparing sandwiches are all considered food preparation. Proper thawing of potentially hazardous foods must also be followed. The local health department will review your procedures and provide information on safe food handling and approved facilities.

State of Connecticut General Statutes
Pertaining to Farming and Farmers’ Markets

The Definition of Agriculture
The definition of agriculture in Connecticut state statute is the legal description of what activities and land uses constitute a “farm”, “agriculture” and “farming”. This is the definition that is used when questions such as “Is this really a farm?”, “How can I tell if what I am doing is considered agriculture?”, or “Is my neighbor really operating a farm?” arise. Over the last twenty years Connecticut has faced mounting challenges to the definition of agriculture as the state has come under increasing pressures to develop land for homes and industry. Most importantly, as you contemplate the definition of agriculture, please pay special attention to the very last sentence in the definition. What this sentence means is that towns in the state of Connecticut have the authority to zone land use as the town sees fit, provided such zoning does not conflict with or ignore state statute. Therefore, it is vitally important that you pay attention to your local government’s treatment of farming, agriculture and its associated activities.

Section 1-1. Words and Phrases.

(q) Except as otherwise specifically defined, the words "agriculture" and "farming" shall include cultivation of the soil, dairying, forestry, raising or harvesting any agricultural or horticultural commodity, including the raising, shearing, feeding, caring for, training and management of livestock, including horses, bees, poultry, fur-bearing animals and wildlife, and the raising or harvesting of oysters, clams, mussels, other molluscan shellfish or fish; the operation, management, conservation, improvement or maintenance of a farm and its buildings, tools and equipment, or salvaging timber or cleared land of brush or other debris left by a storm, as an incident to such farming operations; the production or harvesting of maple syrup or maple sugar, or any agricultural commodity, including lumber, as an incident to ordinary farming operations or the harvesting of mushrooms, the hatching of poultry, or the construction, operation or maintenance of ditches, canals, reservoirs or waterways used exclusively for farming purposes; handling, planting, drying, packing, packaging, processing, freezing, grading, storing or delivering to storage or to market, or to a carrier for transportation to market, or for direct sale any agricultural or horticultural commodity as an incident to ordinary farming operations, or, in the case of fruits and vegetables, as an incident to the preparation of such fruits or vegetables for market or for direct sale. The term "farm" includes farm buildings, and accessory buildings thereto, nurseries, orchards, ranges, greenhouses, hoophouses and other temporary structures or other structures used primarily for the raising and, as an incident to ordinary farming operations, the sale of agricultural or horticultural commodities. The term "aquaculture" means the farming of the waters of the state and tidal wetlands and the production of protein food, including fish, oysters, clams, mussels and other molluscan shellfish, on leased, franchised and public underwater farm lands. Nothing herein shall restrict the power of a local zoning authority under chapter 124.
The “Right to Farm”
This law exempts farms that follow “generally accepted agricultural practices” from nuisance laws, regulations and ordinances related to the odors, noises and other objectionable by-products associated with farming. However, a farmer who causes a nuisance through his own negligence or willful or reckless misconduct is not exempt from such claims.

Section 19a-341. Agricultural or farming operation not deemed a nuisance; exceptions. Spring or well water collection operation not deemed a nuisance.
Agricultural or farming operation not deemed a nuisance; exceptions. Spring or well water collection operation not deemed a nuisance. (a) Notwithstanding any general statute or municipal ordinance or regulation pertaining to nuisances to the contrary, no agricultural or farming operation, place, establishment or facility, or any of its appurtenances, or the operation thereof, shall be deemed to constitute a nuisance, either public or private, due to alleged objectionable (1) odor from livestock, manure, fertilizer or feed, (2) noise from livestock or farm equipment used in normal, generally acceptable farming procedures, (3) dust created during plowing or cultivation operations, (4) use of chemicals, provided such chemicals and the method of their application conform to practices approved by the Commissioner of Environmental Protection or, where applicable, the Commissioner of Public Health, or (5) water pollution from livestock or crop production activities, except the pollution of public or private drinking water supplies, provided such activities conform to acceptable management practices for pollution control approved by the Commissioner of Environmental Protection; provided such agricultural or farming operation, place, establishment or facility has been in operation for one year or more and has not been substantially changed, and such operation follows generally accepted agricultural practices. Inspection and approval of the agricultural or farming operation, place, establishment or facility by the Commissioner of Agriculture or his designee shall be prima facie evidence that such operation follows generally accepted agricultural practices.

(b) Notwithstanding any general statute or municipal ordinance or regulation pertaining to nuisances, no operation to collect spring water or well water, as defined in section 21a-150, shall be deemed to constitute a nuisance, either public or private, due to alleged objectionable noise from equipment used in such operation provided the operation (1) conforms to generally accepted practices for the collection of spring water or well water, (2) has received all approvals or permits required by law, and (3) complies with the local zoning authority's time, place and manner restrictions on operations to collect spring water or well water.

(c) The provisions of this section shall not apply whenever a nuisance results from negligence or willful or reckless misconduct in the operation of any such agricultural or farming operation, place, establishment or facility, or any of its appurtenances.
Definition of a Farmers’ Market
The following section, passed as Public Act 06-52, establishes the farmer’s kiosk at a farmers’ market as an extension of the farmer’s business and that the laws and regulations applied to selling products on a farm shall apply to selling products at a kiosk. The last subsection notes that this section is not to supersede, “any state or local health and safety laws, regulations or ordinances.”

Sec. 22-6r. Certified farmers’ markets. Sale of farm products at farmer's kiosks. Definitions. (a) For purposes of this section:

(1) "Farmers' market" means a cooperative or nonprofit enterprise or association that consistently occupies a given site throughout the season, which operates principally as a common marketplace for a group of farmers, at least two of whom are selling Connecticut-grown fresh produce, to sell Connecticut-grown farm products directly to consumers, and where the farm products sold are produced by the participating farmers with the sole intent and purpose of generating a portion of household income;

(2) "Fresh produce" means fruits and vegetables that have not been processed in any manner;

(3) "Certified farmers' market" means a farmers' market that is authorized by the commissioner to operate;

(4) "Farmer's kiosk" means a structure or area located within a certified farmers' market used by a farm business to conduct sales of Connecticut-grown farm products;

(5) "Connecticut-grown" means produce and other farm products that have a traceable point of origin within Connecticut;

(6) "Farm" has the meaning ascribed to it in subsection (q) of section 1-1;

(7) "Farm products" means any fresh fruits, vegetables, mushrooms, nuts, shell eggs, honey or other bee products, maple syrup or maple sugar, flowers, nursery stock and other horticultural commodities, livestock food products, including meat, milk, cheese and other dairy products, food products of "aquaculture", as defined in subsection (q) of section 1-1, including fish, oysters, clams, mussels and other molluscan shellfish taken from the waters of the state or tidal wetlands, products from any tree, vine or plant and their flowers, or any of the products listed in this subdivision that have been processed by the participating farmer, including, but not limited to, baked goods made with farm products.

(b) A farmer's kiosk at a certified farmers' market shall be considered an extension of the farmer's business and regulations of Connecticut state agencies relating to the sale of farm products on a farm shall govern the sale of farm products at a farmer's kiosk.

(c) A farmer offering farm products for sale at a certified farmers' market shall obtain and maintain any license required to sell such products.

(d) Section 22-6g or this section shall not supersede the provisions of any state or local health and safety laws, regulations or ordinances.
Connecticut Farmer’s Market/Women, Infants and Children Program

Below are the laws pertaining to the Connecticut Farmer’s Market/WIC Program for women with children who qualify for subsidized food allowances to gain access to nutritional food.

Sec. 22-6g. Connecticut Farmers’ Market/Women, Infants and Children Program: Definitions. For the purposes of sections 22-6g to 22-6p, inclusive:

(1) “Application” means a request made by an individual to the department for vendor certification in CFM/WIC on a form provided by the department;

(2) "Authorized farmers' market" means a farmers' market that operates within the service area and is a site authorized by the department for the exchange of vouchers and Connecticut-grown fresh produce;

(3) "Certified vendor" means an individual who has met all CFM/WIC conditions as outlined by the department and who is guaranteed payment on all vouchers accepted, provided compliance is maintained by that individual regarding all CFM/WIC rules and procedures as outlined in the vendor certification handbook;

(4) "Certified vendor identification stamp" means a department-issued stamp that shall be utilized by the certified vendor during each occurrence of voucher deposit in the financial institution of certified vendor choice. This stamp shall remain the sole property of the department and shall be forfeited by the certified vendor to the department in the event of suspension;

(5) "Certified vendor identification sign" means a department-issued sign which shall be clearly displayed by the certified vendor at all times when accepting or intending to accept vouchers in an authorized farmers' market. Signs shall remain the sole property of the department and shall be forfeited by the certified vendor to the department in the event of suspension;

(6) "Certified vendor number" means a personal identification number issued by the department and assigned to an individual whom the department has identified as a certified vendor;

(7) "Commissioner" means the Commissioner of Agriculture;

(8) "Department" means the Department of Agriculture;

(9) "Designated distribution WIC clinic" means a site authorized by the department for dispersal of vouchers by the local WIC agency;

(10) "Distribution" means the process outlined by the department and the means by which local WIC agencies actually dispense vouchers to eligible participants;

(11) "Farm products" means any fresh fruits, vegetables, mushrooms, nuts, shell eggs, honey or other bee products, maple syrup or maple sugar, flowers, nursery stock and other horticultural commodities, livestock food products, including meat, milk, cheese and other dairy products, food products of "aquaculture", as defined in subsection (q) of section 1-1, including fish, oysters, clams, mussels and other molluscan shellfish taken from the waters of the state or tidal wetlands, products from any tree, vine or plant and their flowers, or any of the products listed in this subdivision that have been processed by
the participating farmer, including, but not limited to, baked goods made with farm products;

(12) "Farmers' market" means a cooperative or nonprofit enterprise or association that consistently occupies a given site throughout the season, which operates principally as a common marketplace for a group of farmers, at least two of whom are selling Connecticut-grown fresh produce, to sell Connecticut-grown farm products directly to consumers, and where the products sold are produced by the participating farmers with the sole intent and purpose of generating a portion of household income;

(13) "Fresh produce" means fruits and vegetables that have not been processed in any manner;

(14) "CFM/WIC" means the Connecticut farmers' market supplemental food program for women, infants and children as administered by the department;

(15) "Local WIC agency" means an entity that administers local health programs and which has entered into contract for voucher distribution and related service with the department;

(16) "Connecticut-grown" means produce and other farm products that have a traceable point of origin within Connecticut;

(17) "Posted hours and days" means the operational time frames stated in assurances submitted by a duly authorized representative of an authorized farmers' market which includes a beginning and an ending date for each year of operation;

(18) "Participant" means a client of WIC who is at least one year of age, who possesses one of the WIC classification codes selected for inclusion by the Department of Public Health and who is an active participant in a designated distribution clinic;

(19) "Season" means a clearly delineated period of time during a given year that has a beginning date and ending date, as specified by the department, which correlates with a major portion of the harvest period for Connecticut-grown fresh produce;

(20) "Service area" means the geographic areas that encompass all of the designated distribution clinics and authorized farmers' markets within Connecticut for a given season;

(21) "USDA-FNS" means the United States Department of Agriculture-Food and Nutrition Service;

(22) "Vendor certification handbook" means a publication by the department that is based on USDA-FNS mandates and guidelines, addresses CFM/WIC rules and procedures applicable to a certified vendor, and provides the basis for vendor training. A copy of the publication shall be issued to each individual prior to application. New editions supersede all previous editions;

(23) "Voucher" means a negotiable instrument issued by the department to participants that is redeemable only for Connecticut-grown fresh produce from certified vendors at authorized farmers' markets, with a limited negotiable period that directly correlates to the season designated by the department;

(24) "WIC" means the special supplemental food program for women, infants and children, as administered by the Department of Public Health.

Sec. 22-6h. Connecticut Farmers' Market/Women Infants and Children Program:
Ch. 3: Statutes Pertaining to Farming and Farmers’ Markets

**Purposes. Administration.** (a) There is established the Connecticut Farmers’ Market/Women, Infants and Children Nutrition Program which shall be jointly funded by the state of Connecticut and the Food and Nutrition Service of the United States Department of Agriculture. The program shall supply Connecticut-grown fresh produce to participants of the special supplemental food program through the distribution of vouchers that are redeemable only at designated Connecticut farmers’ markets. The program is designed to provide both a supplemental source of fresh produce for the dietary needs of women, infants and children who are judged to be at nutritional risk and to stimulate an increased demand for Connecticut-grown fresh produce at Connecticut farmers’ markets.

(b) The program shall be administered by the Commissioner of Agriculture who shall maintain all conditions as outlined in the farmers’ market nutrition agreement entered into with USDA-FNS, as amended.

**Sec. 22-6i. Connecticut Farmers’ Market/Women, Infants and Children Program: Eligibility requirements.** (a) The Department of Public Health WIC client screening processes and records shall provide the basis for identifying participants eligible for receipt of vouchers.

(b) Local WIC agencies shall distribute vouchers at designated distribution clinics to participants in the manner specified by the department in the program and procedures guide for distribution clinic staff. Local WIC agency services shall ensure that:

1. Vouchers are distributed only to participants through verification that the client name and number on the distribution registry provided by the Department of Public Health correspond with the client name and number printed on the WIC identification folder in the possession of the participant.

2. Each eligible participant is issued five two-dollar vouchers during each distribution as authorized by the department.

3. The voucher serial numbers issued to the participant correspond to the number in the distribution registry in which the participant signature is affixed.

4. Each voucher issued and the distribution registry are properly signed by the participant in the presence of local agency staff at the time of distribution.

5. A proxy is not allowed to act on behalf of a participant, except in the case of a parent or legal guardian acting on behalf of a participant child or infant, or in the case of a husband acting on behalf of his wife.

6. Each participant is provided a thorough explanation of program guidelines and participant responsibility as outlined by the department.

7. All CFM/WIC support materials are put into use as outlined by the department.

8. Accurate and complete records of all related CFM/WIC activities in the possession of a WIC local agency are maintained and retained for a minimum of four years. In the event of litigation, negotiation, or audit findings, the records shall be retained until all issues arising from such actions have been resolved or until the end of the regular four-year period, whichever is later.

9. All agency records pertaining to this program shall be made available for inspection to representatives of USDA-FNS, the Comptroller General of the United States, the state Auditors of Public Accounts, the department, and the Department of
Public Health as necessary, at any time during normal business hours, and as frequently as is deemed necessary for inspection and audit. Confidentiality of personal information shall be maintained as to all program participants at all times.

**Sec. 22-6j. Connecticut Farmers' Market/Women, Infants and Children Program: Responsibilities of participants.** Participants shall be responsible for:

1. Qualifying under WIC program guidelines and attending a designated distribution clinic during the relevant distribution cycles when vouchers are dispersed;

2. Properly countersigning a voucher at time of use in the presence of the certified vendor who is accepting each voucher in exchange for fresh produce;

3. Using vouchers only to purchase Connecticut-grown fresh produce from certified vendors who display CFM/WIC signs at authorized farmers' markets;

4. Redeeming vouchers on or before the expiration date printed on the face of the voucher or surrendering all claim to the value of vouchers that remain unredeemed;

5. Ensuring vouchers that are received are not assigned to any other party other than as provided by the department;

6. Reporting violations or problems to the department or the local agency; and

7. Reporting all incidents of lost or stolen vouchers to the local agency.

**Sec. 22-6k. Connecticut Farmers' Market/Women, Infants and Children Program: Records. Authorization of markets.** (a) Each authorized farmers' market shall maintain records of operation which shall be provided to the department and which shall include posted hours and days and shall be signed by a duly authorized representative of the farmers' market. Farmers' market assurances shall be submitted in a manner outlined by the department and shall provide evidence of:

1. Whether a farmers' market possesses the capability to serve the additional demands brought about by distribution of vouchers in the area without causing undue harm to the existing farmers' market consumer base; and

2. A willingness by persons associated with the farmers' market to meet all CFM/WIC requirements. Information submitted by a farmers' market shall include, but not be limited to:

   (A) The number of Connecticut-grown fresh produce vendor participants,

   (B) Hours of operation to be maintained per week,

   (C) Season of operation, and

   (D) Accessibility and consistency of farmers' market location.

(b) The department shall give priority to a farmers' market with previous involvement in CFM/WIC provided the farmers' market has maintained the conditions outlined in its farmers' market assurances and does not have a high incidence of certified vendor noncompliance or suspensions.

(c) In determining a farmers' market's authorization, the commissioner shall consider the number of eligible applications received by the department prior to the first of May
which indicate the intent to participate in the proposed farmers' market. The standard for the authorization of a single or principal farmers' market in a county shall be one eligible application for every one hundred participants who participate in the distribution clinic in said county. A minimum of two or more eligible applications shall be required for a farmers' market to receive authorization.

(d) The number of farmers' markets authorized for the season shall be determined by the department no later than the thirty-first day of May prior to each season.

Sec. 22-6l. Connecticut Farmers' Market/Women, Infants and Children Program: Vendor certification. (a) Vendor certification shall not be in effect and vouchers shall not be accepted until receipt by the applicant of a certified vendor identification sign and the applicant copy of the department-vendor agreement.

(b) Vendor certification shall expire at the end of each year of issuance. The department shall not limit the number of vendors who may become certified under CFM/WIC. A vendor who satisfies all the following criteria shall be certified to accept vouchers:

(1) Agrees to maintain only Connecticut-grown fresh produce on display in a certified vendor stall;

(2) Indicates an intent to participate in one or more authorized farmers' markets;

(3) Demonstrates participation in training on CFM/WIC rules and procedures through attendance in an entire session of one of the scheduled training meetings conducted by department staff;

(4) Submits a signed statement of receipts of a vendor certification handbook;

(5) Submits a completed application and crop plan to the department prior to the deadline established by the department; and

(6) Submits completed and signed certified vendor agreements to the department.

Sec. 22-6m. Connecticut Farmers' Market/Women, Infants and Children Program: Responsibilities of vendors. (a) A certified vendor may accept vouchers only for a transaction that takes place at a certified farmers' market and only in exchange for Connecticut-grown fresh produce and may accept vouchers as payment for Connecticut-grown fresh produce only if presented on or before the usage expiration date printed on the face of the voucher.

(b) A certified vendor shall (1) prominently display a certified vendor identification sign as outlined in the certified vendor handbook, (2) provide Connecticut-grown fresh produce to participants upon receipt of a valid and properly completed voucher, which is signed by the WIC client, (3) handle transactions with WIC participants in the same manner as transactions with all other customers, (4) not collect state or local taxes on purchases involving vouchers, (5) charge participants a price for Connecticut-grown fresh produce that is equal to or less than the current price charged to nonparticipant customers, (6) not levy a surcharge based on the use of vouchers by participants, (7) return no cash or issue credit in any form to participants during sales transactions that involve vouchers only and in the event of a single transaction in which a participant presents a combination of cash and vouchers for the purchase of Connecticut-grown fresh produce, cash or credit up to the value of the cash portion of the payment shall be given to the participant, (8) participate in training as the department deems necessary to
carry out the intent of CFM/WIC, (9) cooperate with the department in the evaluation of each season by completely and accurately responding to a survey, with resubmission to the department in a specified and timely manner, (10) immediately inform the department in the event of loss, destruction, or theft of either the certified vendor endorsement stamp or certified vendor identification sign so that a replacement may be issued, and (11) comply with all procedures and rules as herein outlined and as delineated in the department-vendor agreement, the certified vendor handbook and official written notices of clarification issued by the department to the vendor.

**Sec. 22-6n. Connecticut Farmers’ Market/Women, Infants and Children Program: Penalties for violations.** (a) The commissioner shall return a voucher to a certified vendor unpaid if the certified vendor identification number is not properly affixed to the back of the voucher, the certified vendor does not endorse the voucher or the participant's signature is missing on the face of the voucher. A voucher may be resubmitted for payment in the event that the signature or vendor certification identification error can be properly and legally corrected by the certified vendor. Violations of CFM/WIC procedures and rules applicable to a certified vendor shall be identified as Class I violations, Class II violations and Class III violations. Violations involving the use of multiple vouchers in a single sales transaction shall be considered as a single violation. Violations involving multiple sales transactions, regardless of time elapsed, shall be considered multiple violations at a standard of one violation per sales transaction.

(b) For Class I violations, the commissioner shall issue a warning letter to the violating certified vendor. Failure to appropriately display the certified vendor identification sign shall constitute a Class I violation.

c) For Class II violations, the commissioner shall issue an official written citation of noncompliance to the violating certified vendor. The following shall constitute Class II violations:

(1) Noncompliance with rules and procedures as outlined in the vendor certification handbook and in the department-vendor agreement which is not specifically identified as a Class I violation;

(2) Participant is charged a price that is greater than that charged nonparticipant or is charged for items not received;

(3) Refusal to accept valid vouchers for Connecticut-grown fresh produce;

(4) Failure to permit or comply with procedures regarding inspection of evidence by the department when point of origin of fresh produce on display or offered for sale in a certified vendor stall is in question;

(5) Abusive or discriminatory treatment of participants or CFM/WIC staff;

(6) Displaying or offering for sale non-Connecticut-grown fresh produce in a certified vendor stall;

(7) An authorized farmers' market is neither open nor staffed during posted hours and days during the season in which the certified vendor is a designated participant; or

(8) The second like instance of a Class I violation by a single certified vendor.

d) For Class III violations, the commissioner shall suspend the violating vendor from participation in CFM/WIC. The following shall constitute Class III violations:
Sec. 22-6o. Connecticut Farmers’ Market/Women, Infants and Children Program: Citation of noncompliance of vendor. A written notice of noncompliance or suspension from the department shall be pending for seventy-two hours of receipt by the certified vendor. The certified vendor shall be granted the pending period for presenting sufficient evidence to the department to substantiate a reversal. Remedies undertaken in response to receipt of written notice of a pending citation of noncompliance or suspension shall not constitute evidence in defense of such citation. Failure to present any evidence to the department within the specified pending period shall constitute acceptance of the citation of noncompliance or suspension by the certified vendor. Submission of insufficient evidence by the certified vendor for determination of reversal on the pending citation by the department shall result in an official citation of noncompliance or suspension upon completion of the pending period.

Sec. 22-6p. Connecticut Farmers’ Market/Women, Infants and Children Program: Assurances. Vouchers. (a) Assurances, on forms provided by the department, must be submitted no later than the first day of March in order for the farmers’ market to receive consideration of authorization for the upcoming season.

(b) All applications shall be submitted no later than one month preceding the last date in which vouchers may be used by participants at authorized farmers’ markets.

(c) Vouchers shall be valid from the time of issue through the season ending date as designated by the department. Such date shall be clearly printed on the voucher face. Voucher usage shall be null and void after expiration date.

(d) All vouchers accepted by a certified vendor shall be deposited on or before thirty days following the date of expiration for voucher usage by participants. Such date shall be clearly printed on the front of vouchers. Any claim to voucher payment beyond the voucher reimbursement expiration date is not valid and shall be denied.

(e) Deadlines for submission of records, reports, survey instruments and
undistributed vouchers by local agencies shall be established by the department and specified in the agreement entered into with the local agency.

(f) The department shall develop and submit a completed operations report in January in a manner prescribed by USDA-FNS which summarizes the CFM/WIC operations for the previous year.

Connecticut Farmers’ Market/Senior Nutrition Program
The following is the section that establishes the Connecticut Farmers’ Market/Senior Nutrition program to allow qualifying seniors access to nutritional food.

Sec. 22-6q. Connecticut Farmers’ Market/Senior Nutrition Program. (a) There is established the Connecticut Farmers’ Market/Senior Nutrition Program which shall be provided for from funds available to the commissioner and from other sources as such funds may become available. The program shall supply Connecticut-grown fresh produce to senior participants through the distribution of vouchers that are redeemable only at designated Connecticut farmers' markets. For purposes of this section, a "senior participant" is defined as a person who is sixty years of age or older and is currently residing in elderly housing, or is a participant of a registered congregate meal site, or has been identified by a municipal elderly agent as being at nutritional risk. The program is designed to provide both a supplemental source of fresh produce for the dietary needs of seniors who are judged to be at nutritional risk and to stimulate an increased demand for Connecticut-grown produce at Connecticut farmers’ markets.

For further information regarding land use and agriculture, please visit the Department of Agriculture’s website at www.ct.gov/doag or www.CTGrown.gov.

Recent Legislation Pertaining to Farmers’ Markets

Public Act 08-184 was passed during the 2008 legislative session. It includes a provision specific to farmers’ markets and became effective on June 12, 2008. For the specific language for this and other Public Acts the Connecticut General Assembly website is a valuable resource. The address is: http://www.cga.ct.gov.

Melanie Attwater-Young, Legislative Liaison, Department of Agriculture can also be contacted at (860) 713-2509 for assistance.

Public Act 08-184 – An Act Concerning Revisions to Statutes Pertaining to the Department of Public Health

Section 9 of this act allows food service establishments to purchase CT-grown farm products at a farmers' market, as long as they conform with all applicable state and local regulations. Appendix B gives an example of some food items commonly found at farmers' markets that may or may not be suitable for use in a foodservice establishment. If purchasing such products, the food service establishment must request and obtain an invoice from the farmer or person selling the product. The specific definition of farm products is as follows: "Farm products" means any fresh fruits, vegetables, mushrooms, nuts, shell eggs, honey or other bee products, maple syrup or maple sugar, flowers, nursery stock and other horticultural commodities, livestock food products, including meat, milk, cheese and other dairy products, food products of "aquaculture", as defined in subsection (q) of section 1-1 of the general statutes, including fish, oysters, clams, mussels and other molluscan shellfish taken from the waters of the state or tidal wetlands, products from any tree, vine or plant and their flowers, or any of the products listed in this subdivision that have been processed by the participating farmer, including, but not limited to, baked goods made with farm products.

Below is the language of this section.

Sec. 9. Section 22-6r of the 2008 supplement to the general statutes is repealed and the following is substituted in lieu thereof (Effective from passage):

(a) For purposes of this section:

(1) "Farmers' market" means a cooperative or nonprofit enterprise or association that consistently occupies a given site throughout the season, which operates principally as a common marketplace for a group of farmers, at least two of whom are selling Connecticut-grown fresh produce, to sell Connecticut-grown farm products [directly to consumers and to sell fresh produce to food service establishments, as defined in section 19-13-B42 of the regulations of Connecticut state agencies,] in conformance with the applicable regulations of Connecticut state agencies and where the farm products sold are produced by the participating farmers with the sole intent and purpose of generating a portion of household income;

(2) "Fresh produce" means fruits and vegetables that have not been processed in any manner;
(3) "Certified farmers’ market" means a farmers' market that is authorized by the commissioner to operate;

(4) "Farmer's kiosk" means a structure or area located within a certified farmers’ market used by a farm business to conduct sales of Connecticut-grown farm products;

(5) "Connecticut-grown" means produce and other farm products that have a traceable point of origin within Connecticut;

(6) "Farm" has the meaning ascribed to it in subsection (q) of section 1-1;

(7) "Farm products" means any fresh fruits, vegetables, mushrooms, nuts, shell eggs, honey or other bee products, maple syrup or maple sugar, flowers, nursery stock and other horticultural commodities, livestock food products, including meat, milk, cheese and other dairy products, food products of "aquaculture", as defined in subsection (q) of section 1-1, including fish, oysters, clams, mussels and other molluscan shellfish taken from the waters of the state or tidal wetlands, products from any tree, vine or plant and their flowers, or any of the products listed in this subdivision that have been processed by the participating farmer, including, but not limited to, baked goods made with farm products.

(b) A farmer's kiosk at a certified farmers' market shall be considered an extension of the farmer's business and regulations of Connecticut state agencies relating to the sale of farm products on a farm shall govern the sale of farm products at a farmer's kiosk.

(c) [1) A farmer offering farm products for sale at a certified farmers' market shall obtain and maintain any license required to sell such products.

[(2)] (d) A food service establishment, as defined in section 19-13-B42 of the regulations of Connecticut state agencies, [shall request and obtain] may purchase farm products that have been produced and are sold in conformance with the applicable regulations of Connecticut state agencies at a farmers’ market, provided such establishment requests and obtains an invoice from the farmer or person selling [fresh produce] farm products. The farmer or person selling [fresh produce] farm products shall provide to the food service establishment an invoice that indicates the source and date of purchase of the [fresh produce] farm products at the time of the sale.

[(d)] (e) Section 22-6g or this section shall not supersede the provisions of any state or local health and safety laws, regulations or ordinances.
Supplemental Food Programs Offered at Connecticut Farmers’ Markets

Supplemental food programs first became part of Connecticut farmers’ markets in the late 1980’s. It was at this time that Connecticut was chosen as one of ten pilot states to offered the Farmers’ Market Nutrition Program. The first year was a success, and the program has continually grown. Connecticut offers an ideal setting for the supplemental food programs offered. Many large population centers are easily within driving distance for Connecticut farmers, giving them additional markets that may not be available without these programs. These population centers have thousands of Women, Infant, and Children (WIC clients) and low income seniors that receive benefits for use at authorized farmers’ markets.

Currently, there are two separate supplemental food programs offered to Connecticut Farmers’ Markets.

Farmers’ Market Nutrition Program (FMNP)
- Originally began in 1989
- This program is administered by the Connecticut Department of Agriculture
- It serves both WIC clients and low income seniors
- More details about this program can be found on 5a-1

WIC Fruit and Vegetable Check Program
- Originally began in 2010
- This program is administered by the Connecticut Department of Public Health WIC Office
- Its serves WIC clients
- More details about this program can be found on 5b-1

Funding for these programs comes from United States Department of Agriculture – Food and Nutrition Program and the state of Connecticut.

Both of these programs are optional for all Connecticut Farmers’ Markets. A market has the choice of participating in one, both, or neither.

All farmers/vendors bringing eligible products to an authorized market must go through training. Eligible products are described later in this chapter. Each market must make the decision to offer these programs or not to offer these programs. All eligible farmers/vendors MUST participate if a market chooses to offer one or both of these programs.

Last edited 3/24/2010
**WIC/Senior Farmers’ Market Nutrition Program (FMNP)**

**Farmer Training:**

Any farmer that produces fruit, vegetables, fresh cut herbs, or honey who wishes to participate in a WIC/Senior FMNP Authorized Farmers’ Market should contact the CT Department of Agriculture. All producers bringing the products mentioned above must be certified before participating in a FMNP authorized farmers’ market.

The training consists of a short, on-farm meeting. During this meeting, the applicant is presented with a certification packet that contains paperwork that must be filled out and returned. Following the brief explanation of the program, the CT Department of Agriculture Representative performs a production area verification. This requirement is necessary to maintain the integrity of the program and of Connecticut farmers’ markets. The applicant must return the completed Crop Plan, Specialty Crop Plan (if applicable), and a signed Letter of Agreement (LOA). Upon receipt of these documents, the Connecticut Department of Agriculture will issue an authorized vendor stamp needed to deposit the FMNP checks and an authorized vendor poster used for identification purposes at farmers’ markets.

The Connecticut WIC Farmers’ Market Nutrition Program (WIC FMNP) is a congressionally authorized program administered by the Connecticut Department of Agriculture and jointly funded by the State of Connecticut and the United States Department of Agriculture – Food and Nutrition Service (USDA-FNS). This program is designed to provide a supplemental source of fresh fruits and/or vegetables for the clients of the Women, Infants and Children (WIC) Program who are judged to be, “nutritionally at risk,” and to promote agricultural diversification by stimulating the demand for CT Grown fresh, unprocessed fruits and vegetables at farmers’ markets. Connecticut farmers are reimbursed for the face value of the vouchers, which are distributed, to WIC recipients, thereby enhancing the farmers’ earnings and supporting their participation in farmers’ markets. Participating WIC clients receive $15 worth of vouchers that can only be used at designated farmers’ markets and for authorized purchases from state certified vendor/farmers. To be eligible to accept these vouchers, a farmer must have signed a Letter of Agreement and Crop Plan with the Connecticut Department of Agriculture. WIC agencies statewide receive FMNP vouchers from the Department of Agriculture and distribute the WIC FMNP vouchers to all eligible recipients during the months of July, August and September. Each eligible recipient will receive five (5) three-dollar ($3) vouchers ($15 per recipient, per market season). The certified farmers may deposit all FMNP vouchers at any Connecticut financial institution (bank, savings and loan, credit union, etc.) by appropriately endorsing each voucher.
The Connecticut Senior Farmers’ Market Nutrition Program (SFMNP) is administered by the Department of Agriculture. This program is similar in most respects to the WIC FMNP. Seniors from selected towns and cities who live in subsidized, low-income housing, are enrolled in renter-rebate programs, and/or subscribe to congregate meal programs are eligible to participate. Each eligible recipient will receive five (5) three-dollar ($3) vouchers ($15 per recipient, per market season), which can be redeemed at certified Farmers’ Markets. The vouchers are issued to elderly housing sites and/or town social service offices by the Department of Agriculture. The vouchers are distributed to seniors by staff and volunteers of the elderly site.

Ch. 5b: Supplemental Food Programs:
WIC Fruit and Vegetable Check Program

**WIC Fruit and Vegetable Check Program**

Beginning in the summer of 2010, Connecticut Farmers’ Markets will have the option to participate in the *WIC Fruit and Vegetable Check Program*. This program will be running separately from the Connecticut Department of Agriculture’s very popular and well established *WIC Farmers’ Market Nutrition Program (FMNP)* as described in Ch. 5a

**Who does the WIC Fruit and Vegetable Check Program Serve?**

- Women who are pregnant, breastfeeding, or have had a baby in the last six months
- Children under the age of five years old

**Who is involved in the WIC Program?**

This is a federally funded program, through the USDA – Food and Nutrition Service. The program is administered at the state level by the Connecticut Department of Public Health – WIC Program. The State WIC office works with local WIC Agencies state wide to ensure eligible clients receive these benefits and nutritional education. Once checks are received from a local WIC office, eligible clients can redeem these benefits at authorized locations, which now includes certain farmers’ markets throughout the state of Connecticut.

**How does a Connecticut Farmers’ Market Participate?**

In order for a Connecticut Farmers’ Market to participate in the WIC Fruit and Vegetable Check Program, every farmer selling a fruit and/or vegetable must attend a training session and submit the required paperwork to the state WIC office. The market then should declare to the Connecticut Department of Agriculture their intentions to participate in this program.

**What Products are Eligible for the WIC Fruit and Vegetable Checks?**

Most varieties of fruits and/or vegetables. For exceptions, see the next page.
What Products are NOT eligible for purchase with the WIC Fruit and Vegetable Checks?

- No White Potatoes
  - All varieties, including: Yukon Gold, Red Potatoes, Purple Potatoes, Russets, etc
  - Sweet Potatoes/Yams ARE eligible
- No Herbs, fresh or dried
- No Spices
- No Canned, Jarred, Preserved, or Dried Fruits & Vegetables
  - No decorative item – Painted Pumpkins, Gourds
  - No Prepared Foods – breads, pies
  - No Fruit & Nut mixtures
  - No Grain or Grain Mixtures
  - No Garlic
  - No Dried Beans/Peas

How are the transactions handled at an authorized Connecticut Farmers’ Market?

WIC Client:
- Selects eligible commodities and hands a check to the farmer

Farmer:
- Check the ID
  - Compare the family number on the WIC check with the family ID number on the ID card
  - Compare the name on the WIC Check with the name on the ID
  - If they don’t match – terminate the sale. No transaction can take place unless this information agrees
- Make sure the current day is within the “First day to use/Last day to use” boxes on the WIC checks
- Verify the items selected by the client are eligible
- Write in sale amount on the check in black ink. Black ink is recommended.
  - Amount will vary from $5.00 or $6.00. The maximum amount is specified on the check
  - If the sale is less than the maximum amount indicated on the check, then write in the exact amount
  - If the sale is more than the maximum amount indicated on the check, then write in the maximum value and collect the difference from the client
  - No change can be given to the WIC client
- Ask the participant to sign and date the check in black ink (recommended)
- Compare the signature on the check to the one on the WIC ID card
  - If the signatures do not match, terminate the sale
  - The WIC ID card is a booklet/pamphlet that each client will have

What do the WIC Fruit and Vegetable Checks Look Like?
Ch. 5b: Supplemental Food Programs:
WIC Fruit and Vegetable Check Program

What does the WIC ID (booklet each client will have) look like?

Check for a Matching Signature
Ch. 5b: Supplemental Food Programs:  
WIC Fruit and Vegetable Check Program

This is a participant booklet. Within the booklet there are reminders and information for each WIC client. Also with the booklet there will be WIC Fruit and Vegetable Checks and the WIC Farmers’ Market Nutrition Program Vouchers. The WIC clients will bring this along with both WIC Fruit and Vegetable Checks AND WIC Farmers’ Market Nutrition Program Vouchers to the market to make purchases.

The image on the left is the cover, the image on the right is the back cover. Farmers will be concerned with the back cover that will have the signatures on it. This is where they will compare the signature on the check to one of the three signatures on the back of this booklet officially referred to as the WIC ID.

How do the Farmers Deposit the WIC Fruit and Vegetable Check?

Each authorized farmer will receive a WIC Fruit and Vegetable Check Program Endorsement Stamp. This stamp looks different and is different from the WIC/Senior FMNP Endorsement stamp.

- Use this self inking stamp on the front of the check marked “Pay To The Order Of”
- Insure that the check is completed accurately
- Corrections to the amount and/or date can be made by drawing ONE line through the error and writing the corrected information
- WIC Fruit and Vegetable Checks are to be deposited in the farmer’s bank account within 60 days from the “First Day to Use” date stated on the check. If there are no errors, the checks will be paid by the WIC bank within two or three days after deposit.

Checks may be rejected by the bank if…

- The check is redeemed before the “First Day to Use” or after the “Last Day to Use”
- Missing the signature
- Missing the farmers stamp
- Missing the purchase price
- Priced in excess of the maximum dollar value of the check
- Farmer’s bank encodes price incorrectly

Rejected Check Reimbursements

If a check is rejected because of an error on the Local Agency’s behalf:

- The State WIC Program will reimburse the farmer the appropriate amount of the check
Ch. 5b: Supplemental Food Programs:  
WIC Fruit and Vegetable Check Program

- The local agency (where the check was printed) will reimburse the amount of the bank fee. The farmer must petition the local agency for this.

If the check is rejected because of a farmer error:
- The state WIC Program will reimburse the farmer the appropriate amount
- The farmer will be charged a $4.00 administrative fee for each check
- Per federal regulations and the WIC farmer agreement, the WIC Program cannot reimburse bank fees due to farmer errors

Violations: Warnings, Disqualifications, Fines

Warnings will be given if violations are present. The fines listed below will be issued should program abuse be discovered. Farmers’ markets are a new redemption location for this program. Some of these rules may not apply to the farmers’ market but federal requirements of this program require these rules.

Your farm will be permanently disqualified if you or your employees are:
- Convicted in court of trafficking WIC checks or of selling guns, ammunition, explosives or illegal drugs in exchange for WIC checks

Your farm will be disqualified for six years if you or your employees are:
- Administratively found to have bought or sold WIC checks for cash (trafficking), or selling guns, ammunition, explosives, or illegal drugs in exchange for WIC checks

Your farm will be disqualified for three years if you or your employees:
- Over charge the WIC Program on purchases made by clients
- Accept or cash WIC checks from unauthorized vendors, farmers or persons
- Give alcohol, alcoholic beverages, or tobacco products in exchange for a WIC Check

Your farm will be disqualified for one year if you or your employees:
- Accept WIC checks in exchange for unapproved items

Your farm will be disqualified for same amount of time if it is found to be in violation of other federal/state programs such as the Supplemental Nutritional Assistance Program (SNAP), formally known as the Food Stamp Program. A description of this program can be found in Ch. 26 of this guide.

Further Program Violations and associated fines:
A $500 fine may be issued if…
- Requested information within the designated time frame
- The purchase price is not entered in ink on a WIC check at the time of the purchase
A $250 fine may be issued if…
- An altered WIC check is redeemed
- A farmer fails to attend an assigned training session with active participation in the program
- False information is provided in the application for the program

A $125 fine may be issued if…
- A cashier does not check the WIC identification (booklet each client will have) at the time of purchase
- A cashier fails to compare the signature on the WIC check with the signature on the WIC identification booklet that each client will have at the time of purchase
- Prices are not posted on ALL eligible items
- The cashier does not have a WIC customer date a WIC check, after signing it during the transaction
- An unauthorized or counterfeit WIC stamp is used
- Not reporting a change of a farmer’s bank account
- Accepting a WIC check before the “First Day to Use” or after the “Last Day to Use” as specified on the check

**IMPORTANT:**
Farmers are responsible for training their help at the markets. The farmers are accountable for the actions of their employees at the markets.

Guide to Establishing a Farmers’ Market

Farmers’ markets play a vital role in providing small to medium-sized growers access to consumers wishing to buy their farm products. These markets provide a unique marketing experience for both farmers and consumers, enabling them to stay in business and increase profit margins. Consumers can purchase farm fresh products and get the chance to meet and interact with the people who actually grow the food. This form of farmer-to-consumer direct marketing has experienced phenomenal growth in recent years, as producers respond to consumers’ demands with new and alternative marketing strategies for their farm enterprises.

Identifying the site
Preliminary identification and assessment of a market site are essential in determining the feasibility of the project. Give initial consideration to:

- Location- Identify a site with optimum visibility from streets and walkways.
- Space- Assess the number of vendors the site will accommodate.
- Availability- Determine days and hours the site is available.
- Restrictions- Determine if there are any restrictions such as number and type of vendors; ordinances such as any town Zoning issues and/or state and local/district Health Department requirements; parking issues such as need to cover meters; or need to have market site cordoned off.

Market cooperative/sponsors
Groups to contact to identify farmers, determine product availability, and help coordinate market activities include the following:

- Connecticut Department of Agriculture
- Cooperative Extension Offices
- Local Community Organizations
- Town Government
- Agricultural Organizations

Identifying farmers/vendors
Local farmers and vendors should be identified in collaboration with market cooperators/sponsors. Considerations include:

- Establishing direct communication with farmers/vendors
- Developing a good product variety/mix
- Ensuring top-quality products
- Ensuring farmer/vendor diversity.

Schedule
Develop an appropriate operating schedule to maximize the potential of the local harvesting season as well as consumer participation. Issues to consider:

- Fees- Determine the costs of insurance, site fees, advertising and/or marketing
- Season- Determine the number of months to operate the market.
• Calendar- Determine the day(s) of week the market will operate, including market dates and times.

**Rules and regulations for farmers/vendors**

To ensure an efficient and orderly market, it is important to adopt and enforce concise rules and regulations:

- Requirements for participation (farmer, determine if other vendors are needed such as bakery, crafts, specialty foods, etc.)
- Commitment to schedule/season
- Timelines (arrival, setup, disassembly, etc.)
- Cancellation (Specify a period of notification)
- Display area (size of vendors area)
- Signage (name, type of farm/product, price, farm location)
- Vehicle size (Limit truck size for easy site access)

**Market management**

Determine management and operating procedures. An important element of this is to plan for enforcing relevant rules and regulations.

**Market activity**

Entertaining and informative activities that complement the market environment should be planned for consumers. Consider:

- Special events (on-site chef/nutritionist, flower day, seasonal product promotion, etc.)
- Promotional plans (press releases, newsletters, posters, flyers, public service announcements)

**Gleaning**

Farmers’ market groups may want to donate food and/or food products to local food banks and other charitable food groups. They should be sure to check with the local health authority to ensure compliance with requirements for donating to charitable food service establishments such as soup kitchens.

For further information contact the Connecticut Department of Agriculture:

Market Master’s
Suggested
Roles and Responsibilities

The market master (manager) is responsible for the day-to-day operation of the farmers’
market. The role of the market master may vary from handling the basic operation of a
market, to developing the market and coordinating special activities, along with handling
any conflicts that may develop.

Qualifications of the market master

1. Good communication skills and relates well with others.
2. Good organizational skills, responsible, and capable of carrying out a variety of
duties at the same time.
3. Good leadership skills and the ability to guide and maintain the stability of the
market.
4. Is willing to accept the market master position as their sole responsibility.
5. Has a thorough understanding of the regulations and ordinances governing the
farmers’ market, and the effect those rules have on the operation of the market.
6. Good decision-maker, with the ability to make quick, accurate decisions and stand
by them.
7. Reliable and punctual.

Responsibilities of the market master

1. Acts as the administrator of the market, exercising general supervision over the
market and its activities. Keeps the operation of the farmers’ market running
smoothly and effectively.
2. Be familiar with state and local food regulations and requirements.
3. Interprets market rules and regulations. Makes necessary judgments and
decisions if questions or concerns arise.
4. Enforces all farmers’ market rules, regulations, ordinances and codes.
   a. Monitors activities within the market.
   b. Ensures all market activities and events comply with stated guidelines.
   c. Takes disciplinary action when necessary.
5. Mediator
   a. Settles disputes in the market.
   b. Deals with complaints.
   c. Accepts suggestions.
   d. Works to achieve equitable and fair decisions.
6. Communication and information link between all facets of the market development and operation.
   a. Keeps vendors aware of market policies, activities and promotions, serves as a liaison between the market and other businesses and organizations.
   b. Responds to all consumer inquiries and complaints.

7. Responsible for handling market fees.
   a. Collects stall fees from vendors.
      Seasonal fees: A vendor pays a set rate to reserve a specific stall for the duration of the farmers’ market season.
   b. Responsible for handling market fees.

8. Assigns stall to each vendor.

9. Serves as quality control person for the market. All products must comply with the food guidelines developed for the market. Only top quality products should be sold through the farmers’ market.

10. Works with growers to encourage an adequate quantity and a broad variety of products each market day. The market master provides information as to which products are in high demand and/or in low supply.

11. Ensures that all required forms dealing with the operation of the farmers’ market are properly filled out and filed. Crop plan, insurance, and any required licensing should be included.

12. Arranges for someone to be responsible for the market during any absences, and gives vendors prior notice.

13. Maintains a clean and attractive market at all times.
   a. Ensures that the market area is properly cleaned up at the end of the day.
   b. Enforces penalties on vendors who do not leave their stall area clean.

14. Develops and prepares emergency plans. As leader of the farmers’ market, the market manager should always be prepared for emergencies.
   a. It is advisable that she/he have quick access to a first-aid kit and a fire extinguisher.
   b. Knowledge of first aid and CPR is beneficial.

15. May develop and maintain a consumer information booth at the farmers’ market.
   a. Displays point of purchase information.
      i. Supplies nutritional information of specific products.
      ii. Offers recipes, preparation, and storage ideas.
      iii. Provides food samples, protected and served in conformance with state regulations and approval of the local health department, allowing the consumer to see and taste a product.

Suggested Market Rules

The market members or the sponsoring entity should establish rules for the day-to-day operation of the market. Market rules contribute to the experience for the customer, the success of the farmers and keep squabbles to a minimum if they are enforced consistently.

Rules should reflect the purpose for the market and protect the credibility of the market in the eyes of the customer. Many markets operate successfully with a single page of 10 rules. Some choose to be more extensive. Either way, you should make sure each member gets a copy of the rules and reads and understands them. Many markets require members to sign a copy of the rules as part of their membership agreement to ensure they are understood.

How to get started
Decide basic information about how you want the market to work and make rules that ensure those basic items. Democracy is great, but getting everyone to agree on every rule will be difficult. It is best to appoint a committee and have the committee develop some working rules for the season. Ask everyone to direct any comments, questions, or complaints to the committee so they can revisit the rules after a couple of months. Don’t be hesitant to make needed changes; but don’t do it on the basis of one person’s complaint. For every complaint, someone may be very happy with the way the rule reads now.

One of the first rules that should be established is how to make and change rules. This process needs to be fair and open and allow for producer input but should limit endless discussion or arbitrary changes at the whim of one or two members.

Hints for making rules
- Rules should be easily understood.
- Rules should be written down and made available to all members and sponsors.
- Rules need to be fairly and consistently enforced. Rules that can’t be enforced should be scrapped.
- Rules should work to the advantage of the producers selling at the market.
- Rules should protect the credibility of the market by requiring producers to properly label and represent product at the market.
- Most importantly, the rules should protect and direct the market rather than settle squabbles between vendors.

Membership and fees
The rules should specifically state how a producer applies for and maintains his or her membership. Fees should be outlined in detail. Any restrictions on space usage or required number of days at market should be spelled out.
Markets do not have to take all applicants and should set criteria for producers to meet in order to be members. How many market days are they planning on being at the market? Will the product they offer add to the diversity of the market? Competition between vendors is good and should not be discouraged by severely limiting tomato producers, for instance, because your president happens to grow tomatoes. But if space is tight, then a judicious look at applicants who offer something different may be in order.

**Enforcement of rules**
Success of rules depends on the enforcement of those rules. Every market should try and keep from dissolving into numerous petty arguments. Each member should be aware of how the rules are enforced and agree to submit to the process before joining the market. Some markets have instituted levels of violations; for example, being late for the market opening is a small violation whereas selling misrepresented product would be a big violation. Some develop “three strikes and you’re out” provisions. Fair, consistent enforcement and an established way for vendors to lodge a complaint is the key. Market days and times. The days, times and location of your market should be outlined in the rules. Opening date and closing date should also be covered. Opening and closing dates help producers who want to offer early or late product. Established times will help customers find you and know when to shop. If your market closes a market day or location late in the season, or has a location and day that is only open part of the year, the criteria for that decision should be spelled out. Along with establishing and keeping market hours, this is important if your market hopes to accept vouchers for the Farmers’ Market Nutrition Program - WIC or Senior.

**Sources of Products**
**CONNECTICUT GROWN ONLY!** No exceptions. For information on people bringing products or items they don’t produce themselves, please see the Section Titled “Market Types”

**Licensing and necessary permits**
Vendors are required by the health department to obtain different types of permits or licenses for different products. To eliminate market liability for each vendor complying with all regulations, markets may include a catch-all rule that states that each vendor shall be responsible for complying with all applicable state and local laws, regulations and requirements.

**Products allowed**
Each market can determine what products will be allowed for sale at their market. When discussing these rules, it is good to revisit why the market was started in the first place. Products besides agriculture products can give a market a flea market feel that does little to lead to the success of the local farmer.

On the other hand, restricting products to only fresh fruits and vegetables can limit some farmers from branching out into value-added products as well as preventing the market
from attracting all the customers it could. Meats, flowers, jams, gourd art, eggs, and more will help the market grow.

**Spaces**
How spaces are assigned should be included in the rules. Some markets choose to assign spaces based on seniority. Others, in order to encourage and reward producers who come the entire market season, allow producers to choose their space on the basis of number of days they were at the market the previous year. To those starting a new market this issue becomes critical and should be given sufficient attention as it causes many disagreements at markets.

Some agreement needs to be reached on when vendors can move into another vendor’s reserved spot if the vendor doesn’t come to market that day. A specific time for any moves needs to be set so those who wish to move can do so without upsetting a vendor who is running late.

The size of the space each vendor requires will vary. We recommend planning on each vendor needing 3 parking spaces or approximately 24 feet wide. Not all vendors will need all that space and you can adjust your plans from there.

Farmers’ markets need to concern themselves with the safety of both their vendors and their customers. By taking a few simple steps the market can ensure it remains a great place to visit.

**Tents, Umbrellas, Etc.**  
It is reported that the number one cause of injury at farmers’ markets is toppling tents. A gusty wind coming from just the right direction will cause a tent to become a very heavy, damaging projectile. Any market vendor who has sold at an open-air market for any length of time can attest to this.

Because some traditional ways of securing a tent can add a tripping obstacle to the sales area, smart market vendors devise ways to secure tents and umbrellas without adding to the safety problem. Some suggested ways to secure tents include hanging water filled gallon jugs from each corner high in the tent, filling a PVC pipe with sand and hanging it from each corner and securing it to the bottom of the leg as well.

Anything placed lower than waist high can actually create another safety problem. The often-seen concrete block on each leg or a coffee can filled with cement and attached to the tent with bungee cords can pose a trip hazard if some strategy to alert customers to the trip hazard is not employed. Sand bags at each tent leg require the same strategy of drawing the customers’ eye down to see the trip hazard.

**Traffic**  
Markets try to locate themselves in high traffic areas for visibility to draw in the most customers. But anytime you mix pedestrians and vehicles, accidents can occur. Both customers and the passing motorists will be looking at the market offerings and not for each other. A little planning is required to make things safer.

The location of parking in relation to the market can raise several issues. Do the customers park across the street from the market and have to cross a busy street? Perhaps the market should contact local authorities to allow the placement of a sign in the roadway to alert motorists to pedestrian traffic in the area.

The market should post signs to direct the flow of traffic into and out of the parking area allowing for a clear line of sight for exit. These signs can advertise the market as well as serving to ease confusion.

Cars in the market shopping area are not a safe situation for either the vendors or the customers and it is very risky for families with small children. Designing the placement of booths, adding traffic barriers, and the like should be done to protect the walkability of the market shopping space.
Surfaces
Parking lots and the market area should be free of holes, short poles out of the line of sight of drivers, drop off areas and any other obstacle that may cause injury or damage. Any possible problem area should be cordoned off and clearly marked.

Vendors should be cautioned to avoid placing items on the ground around their booth. Empty boxes or containers should be stored in their vehicle and not thrown around the truck. Loose wires, twine, or ropes will present a trip hazard if not covered.

The market area should be kept clean and all produce/garbage picked up or swept away. A piece of cantaloupe or a broken jar of jelly can make a slippery surface out of an asphalt parking lot. Any dropped items should be cleaned up immediately and each market should have supplies on hand to clean these things up.

If dogs are allowed in the market, customers should be gently reminded to pick up after their dogs and a receptacle for them to use should be made available. Also, according to the state Public Health Code, with the exception of permitted guide dogs or assistance dogs, animals are not allowed in areas where the preparing, cooking or serving of food takes place. Related to this, all exposed food must be adequately protected from contamination by any animals. Livestock brought to the market by a farmer for display in conformance with the guidelines offered in Chapter 10 of this manual must be kept at least 20 feet away from any food booths.

Displays
All tables should be stable and setups outside your primary table should be sturdy and able to hold weight. All glass jars and containers should be displayed so that customers can pick up and replace a jar as they shop. The same thing applies to elaborate produce displays. The choice of one tomato should not cause the entire stack to collapse.

Be Prepared
If someone falls at your market and needs first aid are you prepared? A market may keep a first aid kit at the market to handle basic injuries. If market vendors are reluctant to provide first aid, the supplies can be given to the injured person and/or persons there with the injured person to use.

Displaying of Livestock

The Connecticut Department of Agriculture strongly recommends that Connecticut farmers’ markets do not sell or display any livestock and/or animals.

Although multiple benefits of human-animal contact exist, infectious diseases, rabies exposures, injuries, and other human health problems associated with these settings are of concern.

Several infectious disease outbreaks reported during the previous decade have been attributed to animal-related pathogens (i.e. Rabies, *E. coli* O157, *Campylobacter*, *Cryptosporidium*, *Salmonella*, *Coxiella burnetii*, *Mycobacterium tuberculosis*, and Ringworm). Such incidents can have substantial public health, legal, and economic consequences.

If the farmers’ market does elect to display animals, the animals must be kept a minimum of 20 feet from any farmer/vendor stall that contains food products. Hand wash/sanitize stations should be placed in the vicinity of the display. Signage should encourage the use of the hand wash station to prevent illness. No food should be allowed in the vicinity. Local public health can provide guidance.

Please contact the Department of Agriculture at (860) 713-2503 with any questions.

Last Edited 3/20/2009
Food Safety Guidelines and Regulations

The following is only a guideline for selected regulatory requirements. You must be in compliance with all applicable regulations. Contact your local health department for specific requirements and guidance in conforming to the applicable regulations of the Connecticut Public Health Code, section 19-13-B42.

All farmers/vendors at farmers’ markets should contact their local health department for specific requirements and guidance in conforming to the applicable regulations of the Connecticut Public Health Codes (including those listed at the end of this chapter).

Depending on the food items offered and how they are prepared, some or all of the following may be required.

The Basics
This manual cannot cover all situations and food items, but in most situations you must provide equipment and maintain practices that provide for:

- use of potable water
- all produce washed prior to use
- approved sources for food items
- handwashing
- clean utensils
- maintaining proper temperature, if applicable
- delivering samples and prepared foods to the customers in such a manner to prevent anyone from touching any sample or product other than the one they will consume
- food protection
- ensuring that food workers are not working while ill or while experiencing ill symptoms, recent vomiting and/or diarrhea, or have exposed infected boils or lesions

Potable water
All water must be potable. That is, the water shall be drinking quality. Municipal water fits this category perfectly. If you have a private well for a water source, then the water must have been tested and found to be free of contaminants before you use it in the preparation of samples. The local health department can assist you with this task. Approved, commercially bottled water is readily available and can be used for food preparation.

All water used at the market to wash produce, utensils, and for clean up must be disposed of properly and not poured out on the ground.
Produce used for sampling must be washed prior to cutting

All raw produce must be washed thoroughly with running potable water prior to cutting, combining with other ingredients, cooking, or serving in a ready-to-eat form for samples. The water has to be running to carry away any dirt or contaminants that may be on the outside of the product (i.e., you cannot wash your tomatoes in a bucket of clean water). Produce with rinds pose a special problem. Cantaloupes and muskmelons with netting need a good scrubbing to remove all dirt and contaminants from deep in the netting, prior to cutting.

Approved sources for food items

All food ingredients used for the preparation of foods, demonstrations, and for sampling must come from an approved source. This means all meats must be USDA approved and stamped, all milk and milk products must be pasteurized (except for properly aged and licensed raw milk cheeses), all fish and seafood must have been harvested by commercial means under the proper licenses and permits, and all foods offered for individual portion must have been produced in commercial establishments under a regulatory inspection program.

Handwashing and toilet facilities

An adequate number of approved handwashing and toilet facilities must be provided for food service workers as required. The toilet facilities should be conveniently located to the food preparation areas (within 500 feet). Toilets may consist of properly designed, operated and maintained portable toilets.

There must also be a way for food service workers to properly wash their hands. Though a good addition to hand washing, hand sanitizers do not substitute for proper hand washing. Hand sanitizer does not remove soil or eliminate all contaminants. Gloves can be used but you must be careful to keep them uncontaminated and they must be put on after washing hands first.

You should wash your hands or change your gloves anytime either is exposed to potential contamination, including:

- After touching bare human body parts
- After coughing, sneezing, using a tissue, using tobacco, eating, or drinking
- After handling money, unwashed produce, baskets, and anything not clean and sanitized
- Prior to beginning any food preparation including cutting raw fruits or vegetables for samples
- Any time you leave your stand, return, and handle food items in any way (except raw fruit and vegetables)
- After using the bathroom and upon returning to your stand
- After touching animals
- When switching between working with raw foods and ready-to-eat foods

Depending on the market setup, providing for hand washing may mean each vendor must have his or her own station. A station may be shared if it is easily accessible with no
physical impediments between the vendor and the station and has been approved by the local health department.  

The basic items required for a proper hand washing station are:
- A container of potable water of sufficient size to provide enough water for the entire time the market is open. This container should be fitted with a free-flowing dispensing valve and should be raised off the ground to allow a catch basin under the spigot.
- One catch bucket for wastewater that fits under the container of water’s spigot.
- Paper towels
- Liquid hand washing soap in a pump or squeeze bottle.

**Proper handwashing procedure:**
- Wet your hands
- Apply liquid soap
- Briskly rub your hands together – including fingernails and backs of hands for a minimum of 20 seconds (a long time!)
- Rinse your hands under free flowing water
- Dry your hands with a disposable paper towel
Clean utensils

All utensils utilized for preparing food items or samples must be washed in a detergent, rinsed in clean, potable water, and soaked for 60 seconds in a sanitizing solution. Depending on how involved your food preparation or sampling system is, you may need to set up a wash, rinse, and sanitize station for utensils and cutting boards being utilized in the booth.

- If providing a wash, rinse, and sanitize station, sanitizing solution must be approximately 50 parts per million of bleach (approved for use on a food-contact surface) contained in a water solution or another comparable, approved sanitizer. This is approximately one capful of bleach to one gallon of water. The sanitizing container should be of sufficient size to completely immerse the largest utensil in use.
- Allow all cleaned and sanitized utensils to air dry on a clean non-porous surface or dish rack. Do not dry with a towel.
- The “washing, rinsing, and sanitizing station” and the “hand washing station” must be set up before preparing any samples.

If you are only using a few utensils, you may choose to bring a number of clean and sanitized backup utensils with you to the market. Having an adequate supply of clean and sanitized utensils available may be adequate for the food items in your booth.

- If samples of both meat and vegetables are going to be cooked and offered, there should be 3 separate sets of utensils. The first is for raw meat, the second for cooked meat and the third for vegetables and fruits.
- If one of the utensils you use is a knife then you must have a proper cutting board that must be handled like any other utensil – wash, rinse, sanitized. Use only plastic (nonabsorbent) or approved hardwood cutting boards for cutting produce for sampling.
Proper temperature
If you bring cold potentially hazardous foods to the market for sampling you must maintain them at 45°F or below (per DCP meat must be kept at 41°F or below). That means you will need to ice the food items above and below, or provide a refrigerated unit if electrical power is offered to the market. If using ice, you need to make provisions for melted ice to drain away from the product. All ice used for cooling must be made from an approved source. Any potentially hazardous foods you reheat at the market must be heated to 165°F or above within 2 hours. You must have a way to attain this temperature. If you are serving potentially hazardous foods, an accurate and appropriate temperature-measuring device will be required and must be available and used to monitor food temperatures. All potentially hazardous foods need to be cooked to the required temperatures (see the temperature chart provided on the next page). If hot holding these foods at the market, all potentially hazardous foods must be held at 140°F or above.

Food Protection
All food shall be stored off the ground. Keep all food items not wrapped and also all samples covered and protected from dust, insects, customer handling, coughs and sneezes from patrons, and other sources of contamination that may be encountered at the market. Each vendor has the responsibility to protect against contamination of food items from all sources of contamination. If you cannot assure your storage, preparation or sampling methods can meet this standard you will have to consider a new method or even discontinue preparation or sampling all together.

All foods must be protected from unnecessary handling and ready-to-eat foods should not be handled with bare hands. Clean and sanitized utensils should be utilized whenever possible to avoid cross-contamination from handling of food.
Internal Cooking Temperatures:

| Whole Roasts, Corned Beef, Pork Roasts: | 130°F. | 121 minutes |
|                                         | 140°F. | 12 minutes  |
|                                         | 145°F. | 3 minutes   |

Shell Eggs, Fish, Meat (Including Pork)

145°F.  15 seconds

Ground or Comminuted Meat and Fish Products:

| 145°F. | 3 minutes |
| 150°F. | 1 minute  |
| 155°F. | 15 seconds|
| 158°F. | Instantaneously |

Poultry, Ground or Comminuted Poultry,

Stuffed: Fish, Meat, Pasta, Poultry or Stuffing containing PHF ingredients:

165°F.  15 seconds

Raw animal food cooked in a microwave oven shall be:
rotated or stirred throughout or midway during cooking to compensate for uneven distribution of heat;
covered to retain surface moisture; heated to a temperature of at least 165°F. in all parts of the food, and
allowed to stand covered for 2 min. after cooking.

Cold and Hot Holding Temperatures:

45°F. or less or 140°F. or more for all potentially hazardous foods except
whole beef and pork roasts which may be held hot at 130°F. or above

Cooling Requirements:

Cooked Potentially Hazardous Food shall be cooled:
140°F. ⇐ 70°F. within 2 hours
70°F. ⇐ ≤45°F. within an additional 4 hours

Reheating Temperatures:

Potentially Hazardous Food that is cooked, cooled, and reheated for hot holding shall be reheated
so that all parts of the food reach a temperature of at least 165°F. for 15 seconds within 2 hours
except remaining unsliced portions of roast beef which may be reheated to 145°F. for 3
minutes within 2 hours.

Ready-to-eat food taken from a commercially processed, hermetically sealed container shall be
heated to a temperature of at least 140°F. for hot holding. Cooked, cooled, and refrigerated food
that is prepared for immediate service in response to an individual consumer order may be served
at any temperature.
Applicable Connecticut State Regulation

19-13-B42. Sanitation of places dispensing foods or beverages

No person, firm or corporation shall operate or maintain within the State of Connecticut any place where food or beverages are served to the public except in compliance with the following requirements:

(a) Definitions, as used in this section:

1. "Authorized agent" means any individual certified by the commissioner to inspect food service establishments and enforce the provisions of section 19-13-B42 of the Regulations of Connecticut State Agencies under the supervision and/or authority of the director of health.

2. "Comminuted" means reduced in size by methods including chopping, flaking, grinding, or mincing and includes fish or meat products that are reduced in size and restructured or reformulated such as gefilte fish, gyros, ground beef and sausage.

3. "Commissioner" means the commissioner of public health.

4. "Department" means the state of Connecticut Department of Public Health.

5. "Director of health" means the director of a local health department or district health department approved by the commissioner as specified in Connecticut general statutes sections 19a-200 and 19a-242, respectively.

6. "Food employee" means an individual working with unpackaged food, food equipment or utensils, or food-contact surfaces.

7. "Food service establishment" means any place where food is prepared and intended for individual portion service and includes the site at which individual portions are provided. The term includes any such place regardless of whether consumption is on or off the premises and regardless of whether there is a charge for the food. The term does not include a kitchen in a private home where food is prepared or served and not offered for sale, or a bed-and-breakfast operation that prepares and offers food to the guests if such operation is owner occupied and has the total building occupant load of not more than 16 persons including the owner and occupants, and has no provisions for cooking or warming food in the guest rooms, and breakfast is the only meal offered, and placards are posted at the registration area which read "this establishment is exempt from section 19-13-B42 of the regulations of the public health code."

8. "Full-time position" means thirty (30) hours per week or the number of hours per week that the food service establishment is open for business, whichever is less.

9. "Hazard analysis" means an evaluation of food handling operations to identify points of potential product contamination and assess the adequacy of hot processing and hot and cold storage methods for foods.

10. "Potentially hazardous food" means any food or food ingredient, natural or synthetic, that is in a form capable of supporting:

(A) the rapid and progressive growth of infectious or toxigenic microorganisms, or

(B) the slower growth of Clostridium botulism.

11. "Qualified food operator" means a food operator employed in a full-time position who has demonstrated a knowledge of safe food handling techniques.

12. "Ready-to-eat food" means food that is in a form that is edible without washing, cooking, or additional preparation by the food service establishment or the consumer and that is reasonably expected to be consumed in that form.

13. "Supervisory position" means the position of a person who directs and inspects the performance of food service workers.

14. "Temporary food service establishment" means a food service establishment that operates at a fixed location for a temporary period of time, not to exceed two (2) weeks, in connection with a carnival, circus, public exhibition, festival, celebration, or similar transitory gathering.

(b) The floor surfaces in kitchens, in all other rooms and areas in which food or drink is
stored or prepared, in which multi-use utensils are washed, and in walk-in refrigerators, dressing or locker rooms and toilet rooms, shall be of smooth nonabsorbent materials, and so constructed as to be easily cleaned. The floors of nonrefrigerated dry food storage areas need not be nonabsorbent. All floors shall be kept clean and in good repair. Floor drains shall be provided in all rooms where floors are subjected to flooding type cleaning or where normal operations release or discharge water or other liquid waste on the floor. No sawdust or similar material shall be spread on the floors. All exterior areas where food is served shall be kept clean and properly drained, and the surfaces in such areas shall be finished so as to facilitate maintenance and minimize dust.

(c) The walls and ceilings of all rooms shall be kept clean and in good repair. All walls of rooms or areas in which food or drink is prepared, or multi-use utensils or hands are washed, shall be easily cleanable, smooth, light colored, and shall have washable surfaces up to the level reached by splash or spray.

(d)(1) Effective measures shall be taken to protect against the entrance into the establishment or breeding on the premises of insects, rodents and other animals by:
   (A) filling or closing holes and other gaps along floors, walls, and ceilings,
   (B) closed, tight-fitting windows, and
   (C) solid self-closing, tight-fitting doors; or

(2) if windows or doors are kept open for ventilation or other purposes, the openings shall be protected against the entrance of insects, rodents or other animals by:
   (A) 16 mesh to 25.4 mm (16 mesh to 1 inch) screens,
   (B) properly designed and installed air curtains, or
   (C) other methods which are submitted for review and approval by the local director of health. The submission of an alternative method to those listed in (A) and (B) of this subdivision for review by the director of health shall be accompanied by documentation which the director of health finds demonstrates that the method will be as effective in preventing the entrance of insects and rodents or other animals as those listed in (A) and (B) of this subdivision.

(3) Subdivision (2) of this subsection does not apply if flying insects and other pests are absent due to the location of the establishment, the weather, or other limiting condition.

(e) All areas in which food or drink is prepared or stored or multi-use utensils are washed, handwashing areas, dressing or locker rooms, toilet rooms and garbage and rubbish storage areas shall be well lighted. During all cleanup activities, adequate light shall be provided in the area being cleaned and upon or around equipment being cleaned. All rooms in which food or drink is prepared or served or multi-use utensils are washed, dressing or locker rooms, toilet rooms, and garbage and rubbish storage areas shall be well ventilated. Ventilation hoods and devices shall be designed to prevent grease or condensate from dripping into food or onto food preparation surfaces. Filters, where used, shall be readily removable for cleaning or replacement. Ventilation systems shall comply with applicable state and local fire prevention requirements and shall, when vented to the outside air, discharge in such a manner as not to create a nuisance.

(f) Each food service establishment serving food or drink shall be provided with adequate, conveniently located toilet facilities for its employees. Toilet fixtures shall be sanitary and readily cleanable. Toilet facilities, including rooms and fixtures, shall be kept in a clean condition and in good repair. The doors of all toilet rooms shall be self-closing. Toilet room walls shall be tight and extend from floor to ceiling. Toilet tissue shall be provided. Easily cleanable receptacles shall be provided for waste materials, and such receptacles in toilet rooms for women shall be covered. Toilet and handwashing facilities accessible to the public shall be provided in conformance with sections 19-13-B105 through 19-13-B113 of the Regulations of Connecticut State Agencies. Where the use of non-water-carried sewage disposal facilities has been approved by the local director of health, such facilities shall be separate from the food service establishment. All sewage shall be
disposed of in a public sewerage system or, in the absence thereof, in a manner approved by the local director of health. Plumbing shall be so sized, installed and maintained as to prevent contamination of the water supply; as to properly convey sewage and liquid wastes from the food service establishment to the sewerage or sewage disposal system; and as not to constitute a source of contamination of food equipment or multi-use utensils, or create an insanitary condition or nuisance.

The water supply shall be adequate, of a safe, sanitary quality, be in conformance with section 19-13-B102 of the Regulations of Connecticut State Agencies and be from an approved source which is in conformance with sections 19-13-B51A through 19-13-B51M of the Regulations of Connecticut State Agencies. Hot and cold running water under pressure shall be provided in all areas where food or drink is prepared or equipment, multi-use utensils or containers are washed. Hot water supplied in all areas where food or drink is prepared and where multi-use utensils and equipment are washed, and for other general purposes shall be maintained at a temperature of at least one hundred and ten (110) degrees F. through a mixing valve or combination faucet. Hot water supplied at hand washing sinks available to the public shall be in conformance with section 19-13-B111 of the Regulations of Connecticut State Agencies. Ice used for any purpose shall be made from water which comes from an approved source; and shall be used only if it has been manufactured, stored, transported, and handled in a sanitary manner.

Each food service establishment serving food or drink shall be provided with handwashing facilities located to allow for convenient use by employees in food preparation, food dispensing, and warewashing areas, and within or immediately adjacent to all toilet rooms. The handwashing facilities shall be equipped with hot and cold or tempered running water, hand cleansing soap or detergent dispensed in a sanitary manner, individual disposable towels or other hand drying device acceptable to the director of health. The use of a common towel is prohibited. A handwashing facility shall not be used for purposes other than handwashing. The handwashing facilities shall be maintained so that they are accessible at all times for employee use. Such facilities shall be kept clean and in good repair. No employee shall resume work after using the toilet room without first washing his hands.

All equipment and multi-use utensils, and all show and display cases or window counters, shelves, tables, chairs, and refrigerating equipment shall be so designed and of such material and workmanship as to be smooth, easily cleanable and durable and shall be in good repair. The food contact surfaces of such equipment and utensils shall, in addition, be easily accessible for cleaning, nontoxic, corrosion-resistant and relatively nonabsorbent. Sinks, dishtables and drainboards shall be constructed of galvanized metal or better, suitably reinforced, of such thickness and design as to resist denting and buckling, and sloped so as to be self-draining. Exceptions approved by the local director of health may be made to the above material requirements for equipment such as cutting boards, blocks and bakers' tables and containers for dry products.

(1) All equipment shall be so installed and maintained as to facilitate the cleaning thereof and of all adjacent areas.

(2) Equipment in use on October 15, 1963, which does not fully meet the above requirements may be continued in use if it is in good repair, capable of being maintained in a sanitary condition and the food contact surfaces are nontoxic. Utensils containing or plated with cadmium or lead shall not be used, provided solder containing lead may be used for jointing. All cloths and towels used by waiters, chefs and other employees shall be clean.

(3) All multi-use eating and drinking utensils shall be thoroughly washed and rinsed and sanitized after each use, in accordance with the following approved sanitizing processes.

(A) When manual dishwashing is used, a three-compartment sink shall be provided and used wherever washing, rinsing, and sanitization of equipment or utensils are conducted; provided, that in food service establishments where the only utensils to be washed are limited to spatulas, tongs, and similar devices, and when the only equipment to be
cleaned is stationary and does not require disassembly for proper cleaning, a two-compartment sink may be approved by the director of health for this purpose. At least a two-compartment sink shall be provided and used for washing kitchenware and equipment which does not require sanitization. A warewashing sink shall not be used for handwashing or dumping mop water. Sinks used to wash or thaw food shall be sanitized before and after using the sink to wash produce or thaw food. Utensils after thorough washing and rinsing, clean to sight and touch, shall be sanitized by:

(i) Immersion for at least one (1) minute in clean, hot water at a temperature of at least one hundred and seventy (170) degrees F. An approved thermometer shall be available convenient to the vat. The pouring of scalding water over the washed utensils shall not be accepted as satisfactory compliance; or

(ii) Immersion for at least one (1) minute in a sanitizing solution containing: at least fifty (50) mg/l of available chlorine at a temperature of not less than seventy-five (75) degrees F. The bath should be made up to a strength of one hundred (100) mg/l or more of available chlorine and shall not be used after its strength has been reduced to fifty (50) mg/l, or at least twelve and one-half (12.5) mg/l of available iodine in a solution having a pH value not higher than five (5.0) and a temperature of not less than seventy-five (75) degrees F.; or any other chemical sanitizing agent that has been demonstrated to the satisfaction of the director of health to be effective and nontoxic under use conditions, and for which a suitable field test is available. Such sanitizing agents, in solutions used, shall provide the equivalent bactericidal effect of a solution containing at least fifty (50) mg/l of available chlorine at a temperature not less than seventy-five (75) degrees F.

(B) When dishwashing is done by machine hot water for sanitizing may be used provided that:

(i) Wash water shall be kept clean, and rinse-water tanks shall be so protected by distance, baffles or other effective means as to minimize the entry of wash water into the rinse water. All water inlets shall be protected against backflow.

(ii) The flow pressure shall be not less than fifteen (15) or more than twenty-five (25) pounds per square inch on the water line at the machine, and not less than ten (10) pounds per square inch at the rinse nozzles. A suitable gauge cock shall be provided immediately upstream from the final rinse sprays to permit checking the flow pressure of the final rinse water.

(iii) The temperature of the wash water shall not be less than:

(a) One hundred and sixty-five (165) degrees F. for a single temperature stationary rack machine;

(b) One hundred and sixty (160) degrees F. for a single tank, conveyor, dual temperature machine;

(c) One hundred and fifty (150) degrees F. for a single tank, stationary rack, dual temperature machine; and

(d) One hundred and fifty (150) degrees F. for a multitank, conveyor, multitemperature machine.

When hot water is relied upon for sanitization in a mechanical warewashing operation, the temperature of the fresh hot water sanitizing rinse as it enters the manifold shall not be less than one hundred and sixty-five (165) degrees F. for a stationary rack, single temperature machine; or one hundred and eighty (180) degrees F. for all other
machines. The temperature of the fresh hot water sanitizing rinse shall not be more than one hundred and ninety-four (194) degrees F. as it enters the manifold. The item being sanitized shall attain a temperature of one hundred and sixty (160) degrees F. on its surface during the final rinse. When a pumped rinse is provided, the water shall be at a temperature of at least one hundred and sixty (160) degrees F.

(iv) Conveyors in dishwashing machines shall be accurately timed to assure proper exposure times in wash and rinse cycles.

(v) An easily readable thermometer shall be provided in each tank of the dishwashing machine which will indicate the temperature of the water or solution therein. In addition, a thermometer shall be provided which will indicate the temperature of the final rinse water as it enters the manifold.

(vi) Jets, nozzles and all other parts of each machine shall be maintained free of chemical deposits, debris and other soil. Automatic detergent dispensers, if used, shall be kept in proper operating condition.

(C) Dishwashing may be done by machines using chemicals for sanitization provided:

(i) The machines, chemical sanitizer, and method of drying utensils are approved by the commissioner.

(ii) The temperature of the wash water shall not be less than one hundred and twenty (120) degrees F.; and

(iii) the wash water shall be kept clean; and

(iv) Adequate amounts of chemicals for washing, sanitizing, and drying shall be available. Chemicals added for washing, sanitization, and drying purposes shall be automatically dispensed, compatible, not interfering with the effective purpose of each other; and

(v) Utensils and equipment shall be exposed to the final chemical sanitizing rinse in accordance with the manufacturer's specifications for time and concentration; and

(vi) The chemical sanitizing rinse water temperature shall be not less than seventy-five (75) F. nor less than the temperature specified by the machine's manufacturer; and

(vii) A test kit or other device that accurately measures the parts per million concentration of the solution shall be available and used.

(4) All kitchenware and food contact surfaces of equipment that have been used in the preparation or serving of food and drink, and all multi-use food storage utensils, exclusive of cooking surfaces of equipment, shall be thoroughly cleaned at least every four (4) hours. Cooking surfaces of equipment shall be cleaned at least once a day. All food temperature measuring devices, multi-use utensils and food contact surfaces of equipment used in the preparation or storage of potentially hazardous food shall be thoroughly cleaned and sanitized prior to such use and following: a change from working with raw animal foods to working with ready-to-eat foods; a change in the type of raw animal food such as beef, fish, lamb, pork, or poultry; use with raw fruit or vegetables prior to use with potentially hazardous food; and at any time during the operation when contamination may have occurred. Unless approved by the director of health for a different frequency of cleaning, equipment, food contact surfaces and utensils that have been used with potentially hazardous food shall be cleaned and sanitized at least every four (4) hours.

Non-food contact surfaces of equipment shall be cleaned at such intervals as to keep them in a clean and sanitary condition.

(5) No article, polish, or other substance containing any cyanide preparation or other
poisonous material shall be used for the cleaning or polishing of utensils.

(k) After cleaning and until use, all food contact surfaces of equipment and multi-use utensils shall be so stored and handled as to be protected from contamination. All single-service eating and drinking articles shall be made from nontoxic materials, and shall have been manufactured, packaged, transported, stored, handled and dispensed in a sanitary manner, and shall be used only once. Drinking straws or any other device, hollow in nature, whereby through its use a beverage can be drawn into the mouth shall be separately wrapped either individually or in pairs with a sanitary protective covering for individual use. Food service establishments which do not have adequate and effective facilities for cleaning and sanitizing multi-use utensils shall use single-service articles.

(l) All garbage and rubbish containing food wastes shall, prior to disposal, be kept in a leak-proof, nonabsorbent container which shall be kept covered with tight fitting lids when filled or stored, or not in continuous use; provided such containers need not be covered when stored in a vermin-proofed room or enclosure or in a food waste refrigerator. All other rubbish shall be stored in containers, rooms or areas in a manner approved by the director of health. The rooms, enclosures, areas and containers used shall be adequate for the storage of all food waste and rubbish accumulating on the premises. Adequate cleaning facilities shall be provided, and each container, room or area shall be thoroughly cleaned after the emptying or removal of garbage and rubbish. Food waste grinders, if used, shall be installed in compliance with state and local standards and shall be of suitable construction. All garbage and rubbish shall be disposed of with sufficient frequency and in such a manner as to prevent a nuisance.

(m)(1) Except during necessary periods of preparation and service, potentially hazardous foods shall be maintained at forty-five (45) degrees F. or below, or one hundred forty (140) degrees F. or above, except beef roasts and pork roasts cooked to an internal temperature and time specified below may be held hot at one hundred thirty (130) degrees F. or above. The use of time only, rather than time in conjunction with temperature, may be permitted by the director of health and may be used as a public health control for a working supply of potentially hazardous food before cooking, or for ready-to-eat potentially hazardous food that is displayed or held for service for immediate consumption if: the food is marked or otherwise identified with the time within which it shall be cooked, served, or discarded; the food is served or discarded within 4 hours from the point in time when the food is removed from temperature control; the food in unmarked containers or packages, or for which time expires, is discarded; and written procedures that assure compliance are maintained in the food service establishment and are made available to the authorized agent upon request. Except as specified raw food shall be cooked as follows:

(A) Whole roasts, corned beef, and pork roasts shall be cooked to heat all parts of the food to the following minimum temperatures and corresponding minimum holding times: one hundred thirty (130) degrees F. for one hundred twenty-one (121) minutes; or one hundred forty (140) degrees F. for twelve (12) minutes; or one hundred forty-five (145) degrees F. for three (3) minutes;

(B) Shell eggs, fish, meat and pork (other than whole roasts, corned beef, and pork roasts) shall be cooked to heat all parts of the food to at least one hundred forty-five (145) degrees F. for fifteen (15) seconds;

(C) All meat and fish products that are ground or comminuted shall be cooked to heat all parts of the food to at least one hundred and forty-five (145) degrees F. for three (3) minutes, one hundred and fifty (150) degrees F. for one (1) minute, one hundred and fifty-five (155) degrees F. for fifteen (15) seconds, or one hundred and fifty-eight (158) degrees F. instantaneously;

(D) Game meats, poultry, ground or comminuted poultry, stuffed fish, stuffed meat, stuffed pasta, stuffed poultry, or stuffing containing potentially hazardous food ingredients shall be cooked to heat all parts of the food
to at least one hundred sixty-five (165) degrees F. for fifteen (15) seconds;

(E) Raw animal foods cooked in a microwave oven shall be: rotated or stirred throughout or midway during cooking to compensate for uneven distribution of heat; covered to retain surface moisture; heated to a temperature of at least one hundred sixty-five (165) degrees F. in all parts of the food; and allowed to stand covered for two (2) minutes after cooking to obtain temperature equilibrium;

(F) Pasteurized eggs or egg products shall be substituted for raw shell eggs in the preparation of foods that are not thoroughly cooked such as caesar salad, salad dressing; hollandaise or bearnaise sauce, mayonnaise, egg nog, ice cream, egg-fortified beverages, and in recipes requiring pooled eggs that are not cooked immediately. Exempted from the above is a raw animal food such as raw egg, raw fish, raw-marinated fish; raw molluscan shellfish; steak tartare; or partially cooked food such as lightly cooked fish, rare meat, and soft cooked egg that is served or offered for sale in a ready-to-eat form. Pork and poultry products are not exempt from the required cooking times and temperatures. The consumer shall be informed of the risks involved with the consumption of raw or undercooked animal food by means of posters, brochures, menu advisories, label statements, table tents, placards, or other written means available at the food service establishment which state: "thoroughly cooking meats, poultry, seafood, shellfish, or eggs reduces the risk of foodborne illness." Exemptions to the food temperature requirements shall not be allowed at food service establishments serving highly susceptible populations such as immuno-compromised individuals or older adults in hospitals, nursing homes, or similar health care facilities as listed in Connecticut General Statutes section 19a-490 and that are subject to this section and preschool age children in a facility that provides custodial care and is subject to this section such as child day care centers as defined in the Connecticut General Statutes section 19a-77(a)(1).

(2) Frozen food shall be kept at such temperatures as to remain frozen, except when being thawed for preparation or use. Potentially hazardous frozen food which consists in whole or in part of milk or milk products, eggs, meat, poultry, fish, shellfish, or other ingredients capable of supporting the rapid and progressive growth of infectious or toxigenic microorganisms, shall be thawed at refrigerator temperatures of forty-five (45) degrees F. or below; or under cool, potable running water seventy (70) degrees F. or below; or quick thawed as part of the cooking process; or by any other method satisfactory to the local director of health. Waste water from refrigeration equipment shall be disposed of in a proper manner.

(3) Cooked potentially hazardous foods shall be cooled from one hundred forty (140) degrees F. to seventy (70) degrees F. within two (2) hours, and from seventy (70) degrees F. to forty-five (45) degrees F. or below within four (4) additional hours. Potentially hazardous food that is cooked, cooled, and reheated for hot holding shall be reheated so that all parts of the food reach a temperature of at least one hundred sixty-five (165) degrees F. for fifteen (15) seconds, provided that remaining unsliced portions of roasts of beef that are cooked as specified in this subsection may be reheated for hot holding to one hundred forty-five (145) degrees F. for three (3) minutes. Reheating for hot holding shall be done within two (2) hours. Ready-to-eat food taken from a commercially processed, hermetically sealed container shall be heated to a temperature of at least one hundred forty (140) degrees F. for hot holding. Cooked, cooled, and refrigerated food that is prepared for immediate service in response to an individual consumer order may be served at any temperature.
(4) Food temperature measuring devices shall be provided and be readily accessible for use in ensuring attainment and maintenance of proper food temperatures. Food temperature measuring devices shall be accurate to ± two (2) degrees F.

(n) All food and drink in food service establishments shall be from sources approved or considered satisfactory by the director of health, based on a determination of conformity with principles, practices, and generally recognized standards that protect public health; shall be in compliance with applicable state and local laws and regulations; shall be transported and delivered at required temperatures; and shall be clean, wholesome, free from spoilage, free from adulteration and misbranding and safe for human consumption. Any food or drink considered unsafe for human consumption shall be destroyed or disposed of in a manner satisfactory to the director of health. No hermetically sealed, non-acid or low-acid food which has been processed in a place other than a commercial food processing establishment shall be used.

Molluscan shellfish shall be from sources listed in the most recent publication of the interstate certified shellfish shippers list distributed by the Federal Food and Drug Administration and approved or considered acceptable by the Connecticut Department of Agriculture, Bureau of Aquaculture, and, if shucked, shall be kept until used in the containers in which they were received. Shell stock tags or labels shall be retained for 90 days from the date the container is emptied. Finfish shall be commercially and legally caught or harvested. Fluid milk and milk products shall be pasteurized and conform to Grade A standards, the requirements of the United States Public Health Service, Food and Drug Administration "Grade A Pasteurized Milk Ordinance" and "Grade A Condensed Milk Ordinance." Shell eggs shall be from commercial, regulated sources inspected according to law and shall be received clean and sound, and shall be graded as required by law.

(o)(1) All food and drink while being stored, prepared, displayed, served or sold at food service establishments, or during transportation between such establishments, shall be protected from dust, flies, vermin, depredation and pollution by rodents, unnecessary handling, droplet infection, overhead leakage or other contamination. Raw fruits and vegetables shall be washed before use. If used, single-use gloves shall be used for only one task such as working with ready-to-eat food or with raw animal food, used for no other purpose, and discarded when damaged or soiled, or when interruptions occur in the operation.

Food once served to the customer shall not be served again. Wrapped non-potentially hazardous food which has not been unwrapped and which is wholesome may be re-served.

(3) All means necessary for the elimination of flies, roaches and rodents shall be used. All exposed food shall be stored at least eighteen (18) inches above the floor.

(4) Only such poisonous and toxic materials as are required to maintain sanitary conditions and for sanitization purposes may be used or stored in food service establishments. Poisonous and toxic materials shall be identified and shall be stored and used only in such manner and under such conditions as will not contaminate food and drink or constitute a hazard to employees or customers.

(p)(1) Food employees shall wear clean outer garments, maintain a high degree of personal cleanliness and conform to hygienic practices. Food employees shall keep their fingernails trimmed, filed, and maintained so the edges and surfaces are cleanable and not rough. Food employees shall keep their fingers, nails, hands, and exposed portions of their arms clean by using a cleaning compound to lather hands and arms for at least 20 seconds, followed by thorough rinsing with clean water in a handwashing facility, and hand drying using approved sanitary towels or other approved hand drying device. Employees shall wash their hands thoroughly in an approved handwashing facility before starting work. Food employees shall clean their hands and exposed portions of their arms as often as may be required to remove soil and contamination; after touching bare
human body parts; after using the toilet room; after caring for assistance animals; after coughing, sneezing, using a handkerchief or disposable tissue, using tobacco, eating, or drinking; after handling soiled equipment or utensils; when changing gloves; after handling money; immediately before engaging in food preparation including working with exposed food, clean equipment and utensils, and unwrapped single-service and single-use articles; during food preparation as often as necessary to remove soil and contamination and to prevent cross contamination when changing tasks; when switching between working with raw foods and ready-to-eat foods; and after engaging in other activities that contaminate the hands. Employees shall not expectorate in rooms in which food is prepared. All persons, while working in direct contact with food preparation, food ingredients or surfaces coming into contact therewith shall wear hairnets, headbands, caps or other effective hair restraints. Employees shall not use tobacco in any form while engaged in food preparation or service, or while in equipment and multi-use utensil washing or food preparation areas. Designated locations in such areas may be approved by the local director of health for smoking, where no contamination hazards will result.

(2) **Smoking is prohibited in all indoor public areas of a food service establishment. Signs shall be posted at each entrance stating that smoking is prohibited by state law.**

(3) Outdoor seating areas maintained for the service of food that have no roof or other ceiling enclosure and that have a permit to sell alcoholic liquor shall have at least seventy-five per cent of the outdoor seating capacity in an area in which smoking is prohibited and such area shall be designated with written signage as a nonsmoking area.

(4) Outdoor temporary seating areas established for special events and not used on a regular basis shall not be subject to the smoking prohibition or signage requirements of this subsection.

(5) Outdoor seating areas of establishments that do not serve alcohol shall not be subject to the smoking prohibition or signage requirements of this subsection.

(q)(1) All parts of the establishment and its premises shall be kept neat, clean and free of litter and rubbish. Cleaning operations shall be conducted in such a manner as to minimize contamination of food and food contact surfaces. None of the operations connected with a food service establishment shall be conducted in any room used as living or sleeping quarters. Soiled linens, coats and aprons shall be kept in suitable containers until removed for laundering. No live birds or animals shall be allowed in any area used for the storage, preparation or serving of food, or for the cleaning or storage of utensils, or in toilet rooms or employees' dressing rooms or areas, in vehicles used for transporting food, or in any other area or facility used in the conduct of food service establishment operations; provided guide dogs or assistance dogs accompanying blind, deaf, or mobility impaired persons and dogs accompanying persons training such dogs as guide or assistance dogs as defined pursuant to the Connecticut General Statutes Sections 46a-42 and 46a-44, may be permitted in dining rooms.

(2) Adequate facilities shall be provided for the orderly storage of employees' clothing and personal belongings. Where employees routinely change clothes within the food service establishment, one (1) or more dressing rooms or designated areas shall be provided for this purpose. Such designated areas shall be located outside of the food preparation, storage and serving areas, and the multi-use utensil washing and storage areas. When approved by the local director of health, such an area may be located in a storage room where only completely packaged food is stored. Such designated areas or dressing rooms shall be equipped with adequate lockers or other suitable facilities. Dressing rooms and lockers shall be kept clean and orderly.

(r) No person while affected with any disease in a communicable form, or while a carrier of such disease, or while afflicted with boils, infected wounds, sores or an acute respiratory
infection, shall work in any area of a food service establishment in any capacity in which there is a likelihood of such person contaminating food, drink or food contact surfaces with pathogenic organisms, or transmitting disease to other individuals; and no person known or suspected of being affected with any such disease or condition shall be employed in such an area or capacity. If the management of the food service establishment has reason to suspect that any employee has contracted any disease in a communicable form or has become a carrier of such disease, he shall notify the local director of health immediately. When the local director of health has reasonable cause to suspect possibility of disease transmission from any food service establishment employee, such director shall secure a morbidity history of the suspected employee, or make such other investigation as may be indicated, and take appropriate action. The director of health may require any or all of the following measures:

1. the immediate exclusion of the employee from all food service establishments;
2. the immediate closure of the food service establishment concerned until, in the opinion of the director of health, no further danger of disease outbreak exists;
3. restriction of the employee's services to some area of the food service establishment where there would be no danger of transmitting disease; and
4. adequate medical and laboratory examinations of the employee, or other employees, and of his and their body discharges; and
5. food employees shall not contact exposed ready-to-eat food with bare hands and shall use suitable utensils such as deli tissue, spatulas, tongs, single use disposable gloves or dispensing equipment, except when washing raw fruits and vegetables to remove soil and other contaminants. Food employees shall minimize bare hand contact with exposed food that is not in a ready-to-eat form. Ready-to-eat food includes: unpackaged potentially hazardous food that is cooked to the temperatures and time required for the specific food under section 19-13-B42(m)(1); raw, washed, cut fruits and vegetables; whole, raw fruits and vegetables that are presented for consumption without the need for further washing, such as at a buffet; and other food presented for consumption for which further washing or cooking is not required and from which rinds, peels, husks, or shells are removed.

(s)(1) No person, firm or corporation shall operate or maintain any place where food or beverages are served to the public within any town, city or borough, without a local permit or license, or otherwise without registration of the name and business address with the local director of health of the town, city or borough in which the business is conducted, if such permit or license is required by local ordinance. Permits for temporary food service establishments shall be issued for a period of time not to exceed fourteen (14) days.

(2) A temporary food service establishment serving food or drink shall comply with all provisions of this section which are applicable to its operation. The local director of health may augment such requirements when needed to assure the service of safe food, may prohibit the sale of potentially hazardous food or drink consisting in whole or in part of milk or milk products, eggs, meat, poultry, fish, shellfish, or other ingredients capable of supporting the rapid and progressive growth of infectious or toxigenic microorganisms, or may modify specific requirements for physical facilities when in his opinion no health hazard will result.

(3) Food service establishment classification. The director of health, registered sanitarian, or authorized agent shall classify each food service establishment by using the criteria outlined in this subdivision. Establishments shall be classified at the time of licensure, where licensure is required by local ordinance, or otherwise at the time of registration with the local director of health. The classification shall be reviewed by the director of health, registered sanitarian, or authorized agent during each inspection and in no case less than annually. The food service establishment shall be placed into the highest classification that describes any of the food operations conducted. When it comes to the attention
of the director of health, registered sanitarian, or authorized agent that the food
service establishment has changed to a different class the director of health,
registered sanitarian, or authorized agent shall reclassify that food service
establishment. No food service establishment shall change operations to a
different classification without prior written approval by the director of health,
registered sanitarian, or authorized agent. The classes of food service
establishments are as follows:

(A) Class I is a food service establishment with commercially prepackaged
foods and/or hot or cold beverages only. No preparation, cooking or hot
holding of potentially hazardous foods is included except that
commercially packaged precooked foods may be heated and served in
the original package within four (4) hours.

(B) Class II is a food service establishment using cold or ready-to-eat
commercially processed food requiring no further heat treatment and/or
hot or cold beverages. No cooking, heating or hot holding of potentially
hazardous foods is included, except that commercially packaged
precooked foods may be heated and served in the original package
within four (4) hours, and commercially precooked hot dogs, kielbasa
and soup may be heated if transferred directly out of the original
package and served within four (4) hours.

(C) Class III is a food service establishment having on the premises
exposed potentially hazardous foods that are prepared by hot processes
and consumed by the public within four (4) hours of preparation.

(D) Class IV is a food service establishment having on the premises
exposed potentially hazardous foods that are prepared by hot processes
and held for more than four (4) hours prior to consumption by the public.

(4) Qualified food operator required. Each person owning, operating or managing
any food service establishment designated either as class III or class IV shall be
a qualified food operator or shall employ on-site at least one (1) qualified food
operator who is in a supervisory position at said establishment. Each food
service establishment shall be in compliance with this subdivision by August 1,
1997. Satisfactory evidence of compliance with this subdivision shall be
documentation that the qualified food operator has passed a test administered
by a testing organization approved by the department, or other documentation
satisfactory to the department attesting to the individual's knowledge of safe
food handling techniques as specified in subdivision (6) of this subsection. Said
documentation shall be maintained on file at the food service establishment and
provided to the local director of health, registered sanitarian, or authorized agent
on request. Any person who serves meals to individuals at registered
congregate meal sites funded under Title III of the Older Americans Act of 1965,
as amended, which were prepared under the supervision of a qualified food
operator, shall be exempt from the examination requirement for qualified food
operators. Any volunteer who serves meals for a nonprofit organization shall be
exempt from the examination requirement for qualified food operators. Exempt
from the requirements of this subdivision are: temporary food service
establishments and special events sponsored by non-profit civic organizations
such as, but not limited to, school sporting events, little league food booths,
church suppers, and fairs. Soup kitchens that rely exclusively on services
provided by volunteers are also exempt from the requirements of this
subdivision.

(5) Criteria for approval of testing organizations. To be approved, a testing
organization shall make application to the department on forms provided by the
department and therein demonstrate responsibility for all aspects of the testing
system from the development of the test, through test administration including
test security system, documentation of successful test completion and record
maintenance. Testing organizations must reapply for approval every five (5)
years. Testing organizations shall demonstrate responsibility for all of the following areas:

(A) Test development. The test shall be based on an objective job analysis to determine content areas and shall include, but not be limited to, elements that test the qualified food operator's knowledge of food allergies. The test shall be developed based on generally accepted standards of test development. A passing score study to set the required passing scores shall be conducted. Content validation and examination field test studies shall be conducted.

(B) Test security. The testing organization shall have test security systems to ensure the integrity of the test during all phases of test development and handling. Test administrators must be trained in test security procedures. Where client based testing is conducted, proctoring agreements that establish examination handling and proctoring procedures are required between the testing organization and the proctor. Different forms of the test shall be maintained.

(C) Test administration. The testing organization shall serve as the primary contact for individuals interested in the test. Explanatory test materials shall be available to interested parties. Guidelines for test administration shall be developed. The test shall be readily available to meet the needs of Connecticut.

(D) Documentation and record keeping. All individuals taking the test shall be provided documentation indicating whether they passed or failed the test. Statistics on the test including an item analysis shall be maintained. A registry of all individuals who have taken the test shall be maintained. Statistical and registry information shall be made available to the department and local health departments upon request.

(6) Other documentation satisfactory to the department. In the absence of documentation that the qualified food operator has passed a test administered by a testing organization approved by the department, a signed statement by the owner/operator of the food service establishment attesting that the qualified food operator has demonstrated knowledge of food safety as specified in subparagraphs (A) and (B) of this subdivision shall constitute satisfactory evidence of compliance with subdivision (4) of this subsection. The local director of health may require documentation to support the signed statement. The following specific elements of knowledge and competence are required:

(A) Elements of knowledge

(i) Identify foodborne illness--define terms associated with foodborne illness; recognize the major microorganisms and toxins that can contaminate food and the problems that can be associated with the contamination; define and recognize potentially hazardous foods; define and recognize illness that can be associated with chemical and physical contamination; define and recognize the major contributing factors for foodborne illness; recognize how microorganisms cause foodborne disease.

(ii) Identify time/temperature relationship with foodborne illness--recognize the relationship between time/temperature and microorganisms (survival, growth, and toxin production); describe the use of thermometers in monitoring food temperatures.

(iii) Describe the relationship between personal hygiene and food safety--recognize the association between hand contact and foodborne illness; recognize the association between personal habits and behaviors and foodborne illness; recognize the association between health of a foodhandler and foodborne
illness; recognize how policies, procedures and management contribute to improved food hygiene practices.

(iv) Describe methods for preventing food contamination from purchasing to serving-define terms associated with contamination; identify potential hazards prior to delivery and during delivery; identify potential hazards and methods to minimize or eliminate hazards after delivery.

(v) Identify and apply correct procedures for cleaning and sanitizing equipment and utensils-define terms associated with cleaning and sanitizing; apply principles of cleaning and sanitizing; identify materials, equipment, detergent, sanitizer; apply appropriate methods of cleaning and sanitizing; identify frequency of cleaning and sanitizing.

(vi) Recognize problems and potential solutions associated with facility, equipment and layout-identify facility, design, and construction suitable for food service establishments; identify equipment and utensil design and location.

(vii) Recognize problems and potential solutions associated with temperature control, preventing cross contamination, housekeeping and maintenance-implement self inspection program; implement pest control program; implement cleaning schedules and procedures; implement equipment and facility maintenance program.

(viii) Identify and recognize the foods most commonly associated with food allergies.

(B) Demonstrable elements of competency

(i) Assess the potential for foodborne illness in a food service establishment--perform operational food safety assessment; recognize and develop standards, policies and procedures; select and train employees; implement self audit/inspection program; revise policy and procedure (feedback loop); implement crisis management program.

(ii) Assess and manage the process flow-identify approved source; implement and maintain a receiving program; implement and maintain storage procedures; implement and maintain preparation procedures; implement and maintain holding/service/display procedures; implement and maintain cooling and post preparation storage procedures; implement and maintain re-service procedures; implement and maintain transportation procedures.

(7) Replacement of qualified food operator. Whenever the qualified food operator terminates employment, is terminated or is transferred, the person owning, operating or managing the food service establishment shall notify the local health department in writing. A replacement qualified food operator shall be employed within sixty (60) days from the date of termination or transfer of the qualified food operator. The local health department may grant an extension not to exceed an additional sixty (60) days to comply with this subdivision if deemed necessary.

(8) Responsibilities of qualified food operators

(A) The qualified food operator is responsible for operating the food service establishment in compliance with all the provisions of section 19-13-B42 of the Regulations of Connecticut State Agencies. The qualified food operator of each food service establishment is responsible for ensuring training of food preparation personnel. The following are exempt from the examination requirement for qualified food operators but shall receive training from any qualified food operator:
(i) volunteers who serve meals for a nonprofit organization; and
(ii) persons who serve meals at registered congregate meal sites
funded under Title III of the Older Americans Act of 1965, as
amended, which were prepared under the supervision of a
qualified food operator. All such personnel shall receive training
that shall include but not necessarily be limited to: instruction in
proper food temperature control; food protection; personal
health and cleanliness; and sanitation of the facility, equipment,
supplies and utensils. The qualified food operator of each food
service establishment shall maintain written documentation of a
training program, and training records of individual employees,
and shall make these records available to the local health
department upon request. The owner, operator, manager or
qualified food operator of a food service establishment at a
nonprofit organization or registered congregate meal site for
senior citizens shall maintain such documentation and make
such records available to the local health department upon
request.

(B) The owner or manager of the food service establishment shall designate
an alternate person who has complied with section 19-13-B42(s)(6) to
be in charge at all times when the qualified food operator cannot be
present. This alternate person in charge shall be responsible for:
ensuring that all employees comply with the requirements of this
section, and that foods are safely prepared; handling emergencies;
admitting the inspector; and receiving and signing the inspection report.

(t) Inspection of food service establishments. All food service establishments shall be
inspected by the director of health, registered sanitarian, or an authorized agent of the
director of health, if such director, sanitarian or agent has been certified by the
commissioner. Candidates for certification must be sponsored by a local director of
health, and possess as minimum requirements a bachelors degree or three years
experience in a food safety or regulatory food protection program acceptable to the
department. Candidates shall not be involved in the ownership or management of a food
establishment located within his jurisdiction. The certification program shall consist of a
two stage process: (1) successful completion of classroom training and passing score on
a final written exam; and (2) completion of a series of inspections with a certification
officer from the department food protection program. Upon completion of the certification
process, the department shall notify the department of health and the candidate in writing
specifying the issuance of certification and expiration date. The commissioner shall have
the authority to renew certification of each persons conducting such inspections every
three years. Recertification may be granted upon the successful completion of sixteen
(16) hours of approved food protection training every three (3) years. The department
shall be responsible for approving and assuring the provision of such training. Failure to
comply with recertification requirements shall result in the certification to conduct
inspections not being renewed. The department shall notify the director of health and the
chief elected official of the affected food service jurisdiction when a certification is not
renewed. All food service establishments shall be inspected in accordance with this
subsection.

(1) Class I food service establishments shall be inspected at intervals not to exceed
three hundred and sixty (360) days.

(2) Class II food service establishments shall be inspected at intervals not to exceed
one hundred and eighty (180) days.

(3) Class III food service establishments shall be inspected at intervals not to exceed
one hundred and twenty (120) days.

(4) Class IV food service establishments shall be inspected at intervals not to exceed
ninety (90) days, except that an interval not to exceed one hundred and
twenty (120) days may be allowed where one (1) of the inspections is a hazard
(5) Access to establishments. The director of health, registered sanitarian or authorized agent after proper identification, shall be permitted to enter, at any reasonable time, any food service establishment for the purpose of making inspections to determine compliance with this section. He shall be permitted to examine the records of the establishment to obtain information pertaining to food and supplies purchased, received, or used, and persons employed, but not including financial records.

(6) Inspection records. Weighted values. Rating scores. Whenever the director of health, registered sanitarian or authorized agent makes an inspection of a food service establishment, he shall record his findings on an inspection report form included in this section and shall furnish a copy of such inspection report form to the owner or operator. Such form shall summarize the requirements of this section and shall set forth weighted point values for each such requirement. Forms, such as computer forms, which are substantially equivalent to the inspection form included in this section may be approved by the commissioner. Upon completion of an inspection, the director of health, registered sanitarian or authorized agent shall total the weighted point values for all requirements in compliance, such total becoming the rating score for the food service establishment. The total weighted point value shall be scored for each item in violation. The maximum rating shall be one hundred (100).

Last edited 3/27/2009
GENERAL CHECKLIST FOR TEMPORARY FOOD SERVICE OPERATORS:

NOTE: SUBJECT TO ADDITIONS OR DELETIONS BASED ON THE MENU AND VARYING SITUATIONS.

_____ Probe-type thermometer for monitoring proper cooking and holding temperatures (Range of 0°F – 220°F, accurate ± 2°F)

_____ Thermometers for all refrigerators or cooling units – all units used for keeping foods cold must be maintained at a temperature below 45°F. Meat must be kept at or below 41°F.

_____ Coolers packed with ice / ice packs or refrigeration units – if applicable

_____ Plastic wrap / covers for all containers

_____ Hand washing station with liquid hand soap, paper towels, wastebasket

_____ Extra utensils, cutting board, and/or gloves - for food preparation, service, sampling, and demos

_____ Potable water supply – for washing and hand washing

_____ Utensil wash/rinse/sanitize containers – where required

_____ Soap and water solutions – for washing equipment and surfaces

_____ Sanitizer solutions – for sanitizing equipment and surfaces, and for storing wiping cloths

_____ Wastewater disposal container

_____ Grease disposal container

_____ Garbage containers - with plastic liners

_____ Paper towels / Clean wiping cloths

_____ Aprons

_____ Hair restraints

_____ Shelving / crates – for off the ground storage of all food products, single service articles and equipment

_____ Lights – with shields and caps or shatter proof bulbs (if lighting is needed)

_____ Adequate toilet/handwashing facilities— for the food workers with exposed foods as required

_____ Adequate facilities to maintain hot potentially hazardous foods at 140° F. or higher
Food Service (Individual Portions), Sampling and Cooking Demonstrations

The following is only a guideline for selected regulatory requirements. You must be in compliance with all applicable regulations. Contact your local health department for specific requirements and guidance in conforming to the applicable regulations of the Connecticut Public Health Code, Section 19-13-B42.

Farmers Providing Foodservice and Individual Portions at the Market

Cooking, providing samples, or preparing food items at a farmers’ market by any individual, even those not considered to be farmers, will be classified and regulated as a temporary food service establishment. Farmers who wish to cook or prepare food such as sandwiches, grilled meat, cider or other types of fresh juices, etc. at a farmers’ market or who will be providing individual portions of food prepared on-site or that were previously prepared at an off-site location different than the market location, must contact their local health department for guidance regarding permit applications, food safety rules and regulations, and inspections. Cooking or preparing food at a farmers’ market will generally require some form of local health department permit and inspection. Particular food safety concerns include employee hygiene (including hand washing), protecting food products from human (sneezing, coughing, etc.) and environmental (dust, insects, etc.) contamination, cooking potentially hazardous foods at temperatures high enough to destroy harmful pathogens, maintaining safe hot and cold holding temperatures, and keeping utensils clean and free of contamination. This type of food service is subject to Section 19-13-B42 of the Public Health Code.

If you plan to cook or prepare individual portion food items at your market or within your booth, you must contact the local health department that has jurisdiction over foodservice establishments in the town where the farmers’ market is located.

Be advised that your local health department reserves the right to restrict items prepared at a temporary food service setting based upon degree of food safety risk. The local director of health may augment such requirements when needed to assure the service of safe food, may prohibit the sale of potentially hazardous food or drink consisting in whole or in part of milk or milk products, eggs, meat, poultry, fish, shellfish, or other ingredients capable of supporting the rapid and progressive growth of infectious or toxigenic microorganisms, or may modify specific requirements for physical facilities when in his/her opinion no health hazard will result.
Food Vendors (other than farmers)
The selling, cooking, providing samples, or preparing food items at the farmers’ market by anyone will be classified and regulated as a “temporary foodservice establishment” and must operate in accordance with the CT PHC 19-13-B42 and all local ordinances including but not limited to application, permit and licensing, fees, and inspection. These types of vendors include, but are not limited to value-added vendors, bakeries, restaurants, hot dog vendors, itinerant vendors, ice cream vendors, etc.

A “temporary food service establishment” is defined as a food service establishment that operates at a fixed location for a temporary period of time, in connection with a carnival, circus, public exhibition, festival, celebration, or similar transitory gathering. Vendors seeking to obtain a “temporary food service establishment” permit will need to contact the local health department in the particular town or district in which they intend to operate. Permit fees for temporary food service establishments are determined by each individual local health department.

Any food service vendor at the market who is preparing foods, providing samples, or conducting a cooking demonstration needs to contact the appropriate local health department prior to setting up at the market.
Farmers Providing Food Samples

Providing food samples at farmers’ markets allows consumers to try a product before purchasing it. This is especially important when the farmer is offering a new or different product that the customer has never tried before. Unsafe sampling methods can contaminate food and result in foodborne illness. Good marketing practices require that basic sanitation practices be followed when samples are offered at farmers’ markets. Following the basic food safety practices mentioned in Chapter 11 can reduce your risk. The farmer offering samples should look carefully at every step of their sampling process to make the samples as safe as possible. The regulations of the Connecticut Public Health Code 19-13-B42 apply to all food samples offered at the farmers’ market, including cut produce, fresh squeezed juices of all types, grilled meats, dips, spreads, etc.

Sample delivery

It is a good practice to use disposable single-use utensils for distribution of samples to customers. These include toothpicks, cups, etc. or you can use tongs if you control them. Customers should never reach into a plate or bowl containing exposed samples. You should have a wastebasket lined with a plastic bag available for customers to dispose of their sample waste. Follow the handwashing protocols discussed in the chapter titled “Food Safety Guidelines and Regulations” to prevent contamination of the food. Use toothpicks, wax paper, paper sampling cups or another appropriate means to distribute samples. In this way each farmer and his workers can prevent the hands of customers from touching and contaminating the food. Each farmer’s dispensing method must prevent contamination by the customer, additional workers, and the farmer.

If you plan to offer samples at your market or within your booth, you must contact the local health department that has jurisdiction over foodservice establishments in the town where the farmers’ market is located.
Cooking Demonstrations

One of the most successful events at farmers’ markets is hiring a chef to come to the market to cook seasonal produce, meats and other products, and offer samples to the customers of the market. In order to promote uniformity and farmers’ market food safety across the state, all farmers’ markets that intend to conduct cooking demonstrations are required to operate in accordance with section 19-13-B42 of the Connecticut Public Health Code as well as the guidelines and procedures discussed in the following sections.

1. Samples must have been prepared from approved source foods only.
2. In all instances the person cooking, whether they are a farmer, hired chef, or other individual, shall comply with section 19-13-B42 of the Connecticut Public Health Code for temporary food-service establishments and requirements for sampling at the market.

Summary of cooking demonstration requirements

- If the cooking and prep areas of the demonstration are not under cover, some sort of overhead protection needs to be provided. A tent, canopy, or umbrellas are examples of overhead protection. The product needs to be protected at all times.
- Food products shall not be exposed to insects or other environmental contaminants such as dust, as well as any unnecessary handling as seen with bare hand contact of food. If electricity is available, a fan may be used to keep a gentle breeze going to keep insects off the product. (The chef may appreciate the fan as well.) Covering product in some manner at all times will also deter insects.
- During the event, the person cooking will need a way to wash his/her hands. A simple, health department-approved set up could consist of an elevated container of potable water that is equipped with a turn-spout dispenser or drain, with a catch bucket placed below the container. Liquid soap and disposable towels must also be provided at the hand wash station. The section on “Food Safety Guidelines and Regulations” discusses hand wash stations and includes a picture of the simple setup.
- Facilities to wash and sanitize all utensils used throughout the day may be required, depending on the type of cooking demonstration and the food items involved. A three-compartment sanitizing wash station can be easily constructed with three tubs, potable water, soap, and an approved sanitizer. A temporary event 3-bay setup is pictured in the “Food Safety Guidelines and Regulations” section. You will find that this set up is convenient for cleaning up after the event. You will need more water than you think so bring an adequate supply. Remember, utensils must also be protected from insects, dust and other forms of contamination. An extra measure of protection for clean utensils, food, and food-related items can be accomplished by storing the items in a plastic container with a tight-fitting lid.
- All potentially hazardous foods must be maintained at safe hot and cold temperatures throughout the entire event. Hot potentially hazardous foods must be maintained at an internal temperature of 140°F or greater. Cold potentially hazardous foods must be maintained at 45°F or less. Coolers and plenty of ice packs must be available. Coolers cannot be made of Styrofoam, as these coolers
are impossible to sanitize. At no time should any product sit in water. You will need to have provisions for melted ice to drain away from the product.

**Serving the cooking demonstration samples to your customers**
The samples need to be adequately protected from all forms of contamination. The easiest way to accomplish this is to serve each sample individually. Examples are to serve each sample in an individual cup or plate or served with individual toothpicks. (You should provide plenty of waste containers to dispose of these items.) This will help to avoid customers touching any sample that is not theirs. This works best if you have a helper that controls the samples and will reduce the chance of any cross contamination. Helpers should be careful to avoid touching the product and avoid contamination of any utensils used to portion out the samples.

Farmers who plan to conduct cooking demonstrations of products being sold within their booth, must contact the local health department that has jurisdiction over foodservice establishments in the town where the farmers’ market is located.
Ch. 12: Food Service (Individual Portions), Sampling and Cooking Demonstrations

**Licensing**

**Food Service License/Permit for Farmers**

Farmers, who are participating in local farmers’ markets as vendors, and are selling **ONLY** fresh, raw, unprocessed produce are typically not regulated by the local health departments.

Fresh produce includes fruits and/or vegetables that have not been processed in any way. This means that the products have not been washed, cut, peeled, dried, pickled, packaged, cut, or modified from their natural state in any way. Rinsing of fresh fruits and vegetables for marketing purposes is a common practice. This is acceptable if clean water is used to rinse the produce and it is clear that the rinsed produce is not pre-washed and intended to be ready-to-eat. It is highly recommended that consumers be advised to wash all produce prior to consumption.

Farmers intending to sell or offer food beyond fresh, raw produce must contact the local health department in the particular town or district in which they intend to operate. Licenses for processed/manufactured products must be obtained from the state agency having jurisdiction over the specific food item being processed, unless the food item is a jam, jelly, preserve, or maple syrup exempt by state statute and properly labeled.

**Licenses/Permits for Processed Products**

Although the sale and marketing of whole, fresh, uncut fruits and vegetables generally does not require a permit to operate, the sale of processed food products in Connecticut typically requires some permit (or permits) to operate. When does a product become “processed?” Generally speaking, whenever you take a knife to a raw agricultural product, change its temperature and/or combine ingredients, or dry, portion, or pickle the product, it is a “processed” product. Packaged food products are also typically considered processed products.

You will need to check with both your market and appropriate state/local health departments before you plan to process and sell any of your products. Processors should be aware that processing a product, even minimally, increases the risk of contamination.

For these reasons, it is important that you make every effort to communicate your plans to state and local health department officials well in advance of actual manufacture and promotion of the food product.

Last edited 11/20/08
Requirements of Processed/Packaged Foods and Baked Goods

The term "processed food" means any food other than a raw agricultural commodity and includes any raw agricultural commodity that has been subject to processing, such as canning, cooking, freezing, dehydration, or milling. Processed foods can include single ingredient foods such as flour or a watermelon that has been cut.

All packaged food products, regardless of whether or not they require a Connecticut license issued by the Department of Consumer Protection, must meet sanitary requirements and are subject to inspection by the Department of Consumer Protection. Local/district health departments may also inspect and/or license food processors.

Processed/packaged food products include but are not limited to:
- Bakery products
- Juice and other beverages packaged in bottles/jars
- Maple syrup and foods made with maple syrup
- Popcorn and kettle corn
- Candy, toffee and/or fudge
- Trail mix and nuts
- Pickles and relishes
- Jams and jellies
- Meat
- Seafood
- Cut produce
- Salsa, dips and dressings

Licensing
The following are items that require licensing. Some items have a specific chapter in this manual that should be referred to for further details. This list should not be considered exhaustive. If you are making or considering making and selling a product that you do not see on this list, please refer to the contact information at the end of this chapter for the Division of Food and Standards at the Department of Consumer.

- Baked goods (i.e. pies, breads, cookies, etc.) require a Connecticut Bakery License. See also Chapters 11 and 12 concerning Food Safety and Food Service
- Apple Cider requires a Connecticut Apple Juice/Cider Registration. See also Chapter 22 concerning Cider.
- Beverages (i.e. juice drinks, lemonade or bottled water) require a Connecticut Non-Alcoholic Beverage License. See also Chapters 11 and 12 concerning Food Safety and Food Service
• Frozen Desserts (i.e. ice cream, frozen yogurt, etc.) require a Connecticut License to Manufacture Frozen Desserts for Retail/Wholesale. See also Chapter 17 concerning Dairy and Frozen Desserts.

**Manufacturing and labeling of processed foods**

All processed foods must be made in an approved facility that has been inspected and licensed by the Department of Consumer Protection. (See Chapter 23: Exempt Items for exceptions.) Facilities that manufacture foods shall not be used for residential use. It is important to note that all aspects of the manufacturing, processing, packaging, displaying and transporting of foods must be clean and sanitary and are inspected for the same.

Processed foods must also be properly labeled. Food labeling shall include, but not be limited to, the following items:

- Common or usual name
- Ingredients in descending order by predominance by weight
- Declaration of responsibility (name and address of manufacturer or distributor)
- Net weight or volume expressed in metric and English units
- For seafood, the country of origin

Pursuant to the Federally mandated Country of Origin Labeling, the Connecticut Uniform Food & Drug Act and Section 43-3b of the Connecticut General Statutes packaged food sold in Connecticut must be labeled in accordance with the Federal Food Drug and Cosmetic Act, the Federal Fair Packaging and Labeling Act and the Uniform Packaging and Labeling Regulation as adopted by the National Conference of Weights and Measures.

**Transporting and displaying processed foods**

Processed foods must be transported in a sanitary manner. When at the market they must be protected either by being properly packaged or by being displayed in an appropriate display case. Perishable and potentially hazardous foods must be held at the following specified temperatures. For:

- Cut produce - at or below 45°F.
- Meat storage rooms - at or below 41°F.
- Frozen foods - at or below 0°F. and maintained in a frozen solid condition (i.e. no thawing & refreezing)

Unprocessed Fruits and Vegetables

Unprocessed, whole, raw fruits and vegetables shall be wholesome, free from spoilage, and otherwise deemed safe for human consumption based on generally recognized industry standards. Fruits and vegetables that have been cut, peeled, dried, pickled, packaged, or modified from their natural state in any way are no longer considered a raw fruit or vegetable and may be subject to licensing in order to sell or sample at a farmers’ market.

Food safety concerns are at an all time high. There are several on-farm food safety audits that are available on a voluntary basis. Currently, there are no mandatory on-farm inspections for fruits and/or vegetables. Please take great pride and careful consideration when preparing fields, picking product, packaging product and delivering it to your customers. Cooperative Extension and the Agriculture Experiment Station each have a staff of professionals available to make recommendations to make your operation safer and more profitable. Fruits and vegetables make up the backbone of every farmers’ market, and in Connecticut we pride ourselves in being able to provide the freshest and safest fruits and vegetables to our faithful consumers.

Please remember, any farmers wishing to sell fruits or vegetables at a WIC certified farmers’ market must contact the Connecticut Department of Agriculture prior to participating in the market. For more information please see WIC/Senior Farmers’ Market Nutrition Program chapter.

For further information contact the Connecticut Department of Agriculture:

Meat Requirements

Except for special exempt cases, all meat and processed poultry sold in Connecticut must be USDA inspected. This requirement extends to the slaughter, processing and packaging stages. Any meat that is slaughtered, processed or packaged outside of USDA inspection is not legal for sale in Connecticut.

Slaughtering and processing
All meat and poultry products sold in the state of Connecticut must be slaughtered and processed under USDA inspection. Please be aware that just because an animal has been slaughtered in a USDA inspected facility does not mean that the carcass can be taken to another facility to be cut and packaged unless that facility is also under USDA-FSIS inspection and the processing takes place under USDA inspection.

Labeling
Labels must include the following information under USDA and Connecticut regulations:
- Species, primal source and standard descriptive term (retail name)
- Name of packaging firm
- Address of packaging firm
- Net weight
- Price per pound
- Total package price
- Whether the product is boneless or bone-in
- Safe handling label
- List of all ingredients for multi-ingredient products such as sausage
- Species and primal source or area if not a multi-ingredient product as follows:
  - Beef: cheeks, tongue, gullets or esophagus, shoulder, chuck, heart, brisket, shank, shin, rib, plate, diaphragm, loin, flank, rump, top round or bottom round
  - Veal: cheeks, tongue, gullets, or esophagus, heart, neck, shank, breast, shoulder, rib, loin, sirloin, rump or leg.
  - Lamb: cheeks, tongue, gullets or esophagus, heart, neck, shank, breast, shoulder, rib, loin or leg
  - Pork: cheeks, tongue, gullets or esophagus, heart, tail, jowl, shoulder, shoulder picnic, shoulder butt, feet, side, spareribs, loin, loin-shoulder end or loin-rib end, loin-center cut, loin-loin end, fat back or ham

Packaging and retail sale
The bottom of the package must be at least 70% visible and labeling on top of the package must not exceed the specified area in relation to the total package size. There are exemptions to this rule for ground meat, liver and sausage. If minimum visibility requirements are not met, a “100% Guarantee” label must be provided on each package.
and honored by the vendor. Any repackaging must be done following the provisions of sections 21a-101-1 through 21a-101-8 of the Regulations of Connecticut State Agencies.

All retail meat sales rooms are subject to Department of Consumer Protection approval/inspection and must comply with the Connecticut sanitary standards for food establishments (see citation below) and all local authorities including the local health department/district, fire marshal and zoning requirements.

**Sale of animal for custom slaughter or “custom exempt”**

“Custom exempt” is a USDA provision that applies to live animals that have been purchased by a customer and are slaughtered per customer request. These animals are either slaughtered and processed by the owner or slaughtered and processed at the request of the owner on a custom basis by the farmer from whom it was purchased.

“Custom exempt” is regulated under USDA- FSIS - Food Safety and Inspection Service (FSIS). “Custom exempt” meat must be labeled “Not for Retail Sale” and is intended for consumption by the owner and may not be resold. Food service establishments in the state of Connecticut may not purchase “custom exempt” meat.

**Handling**

Meat that has never been frozen must be kept at 41°F-33°F at all times and frozen meat must be maintained frozen at all times. It is of critical importance that these standards be maintained. It is also of critical importance that any frozen product, once thawed be maintained at 32°F–41°F. The maintenance of appropriate holding temperatures is subject to inspection at farmers’ markets.

For further information or clarification on federal requirements, please contact:

Poultry Requirements

The sale of Poultry at farmers’ markets is allowed under the USDA Poultry Exemption Provision Custom Exemption.

- Custom exemption, both slaughter and processing, exempts an operator from the requirement of federal inspection when he/she prepares a product for the personal use by an individual.
- The poultry must be owned by the individual prior to slaughter.
- The carcasses, parts, meat and meat food products on the poultry must be used exclusively by the owner and the members of the owner’s household, non-paying guests or employees.
- A federal inspector does not need to be present when poultry is slaughtered or processed.
- An operator is considered custom when he/she charges a fee for the service in lieu of the poultry itself.

Exemptions from federal inspection

The Federal Meat Inspection Act (FMIA) and the Poultry Product Inspection Act (PPIA) exempt various operations from the requirements of federal inspection. The two pieces of legislation differ greatly. Therefore, do not assume that what holds for beef will hold for chicken. Be sure to refer to the proper regulation for your product.

Keep in mind that some of these exemptions will change periodically and in some cases a policy is developed to cover a specific situation, which is not directly addressed.

Below are the federal poultry exemptions as outlined in Section 464 of the PPIA

USDA Food Safety and Inspection Service (1-518-452-6870 or 1-800-772-7033)

A custom exemption business may slaughter or process an unlimited number of poultry when the poultry is delivered by the owner and the following five criteria are met:

1. The custom slaughterer does not engage in the business of buying or selling poultry products capable for use as human food;
2. The poultry is healthy when slaughtered;
3. The slaughter and processing at the custom slaughter facility is conducted in accordance with sanitary standards, practices, and procedures that produce poultry products that are sound, clean, and fit for human food (not adulterated);
4. The custom slaughtered or processed poultry is for the personal use of the grower/owner of the poultry – the grower/owner of the custom slaughtered or processed poultry may not sell or donate the custom slaughtered poultry to another person or institution; and

The shipping containers bear: the owner’s name, the owner’s address, and the statement, “Exempt P.L. 90-492”

The PPIA can be viewed in full at the following website:
Handling
Slaughter must take place under appropriate conditions. The process must occur in a sanitary facility. All birds subject to slaughter must be non-adulterated and free from disease.

Poultry meat must be held at or below 41°F. If the meat is frozen at any point, the poultry must be kept at such temperatures as to remain frozen. It is of critical importance that you maintain these standards. You may be subject to inspection at a farmers’ market with regard to the maintenance of appropriate holding temperatures for poultry.

Record keeping and labeling
Once a live bird is sold to an individual customer and provisions have been made between the customer and the farmer to have the bird dressed by the farmer, the processed bird cannot under any circumstances be resold. **Resale is prohibited.** Unclaimed birds may not be resold. The original customer may pick-up the bird at the farm, as long as the bird has been transported back to the farm under proper temperature controls.

Sale to any Connecticut food establishment, including but not limited to hotels, restaurants and institutions is prohibited. Farmers should be keep in mind that any local health sanitarian made aware of a customer purchasing large quantities of fowl at one time may warrant further investigation to be certain the customer is not purchasing the product for use in a foodservice establishment. This may include reviewing farm records and logs pertaining to sales of custom-slaughtered poultry. Logs and records regarding sales of custom-slaughtered poultry must be made available to the sanitarian, if requested.

Included with any poultry meat at the time of delivery must be a label that includes the following information in legible 10 point font:

- Customer’s name, address and phone number
- Date of order
- Date of requested pickup
- Details of order (type of bird, quantity, etc.)
- Signature of customer upon delivery
- “Poultry not processed in a government inspected facility, or under USDA or State of Connecticut inspection process”
- “This bird has been custom slaughtered and therefore is **not for retail sale.** It is for personal use by the purchaser only.”
- “Not for use in any Connecticut food establishments, including but not limited to hotels, restaurants, and institutions.”

**POULTRY TAGS:**
**Ch. 16: Poultry Requirements**

**01001**

Date:

Customers Name:

Address:

Phone Number: Date of P/U:

Order Type:

Signature:

“Poultry not processed in a government inspected facility, or under USDA or State of Connecticut inspection process. This bird has been custom slaughtered and therefore is **not for retail sale.** It is for personal use by the purchaser only. Not for use in any Connecticut food establishments, including but not limited to hotels, restaurants, and institutions.

- Each Poultry Tag should be number for filing and tracking purposes.
- The farmer is required to keep a record of all transactions for two years.

**IN ADDITION:**

POULTRY MAY ALSO BE SOLD IF SLAUGHTER, PROCESSING, & PACKAGING ARE DONE AT A USDA/FSIS POULTRY INSPECTED FACILITY.

Dairy and Frozen Desserts Requirements

Dairy products are one of the most regulated foods and must be handled properly at all stages of production, distribution and use in order to be safe for human consumption. The following recommendations are critical in maintaining safe, quality product.

Milk
Refrigeration is the single most important factor in maintaining the quality of milk. By law, Grade A milk must be maintained at a temperature below 40°F. to prevent the growth of spoilage bacteria. It is critical that these temperatures be maintained through warehousing, distribution, delivery, handling and storage. It is wise to refrigerate milk promptly after purchase and each use. Properly refrigerated, milk should last 3-5 days beyond the sell date. The colder milk is kept the longer it lasts.

According to Section 22-133-132 of the Regulations of the State of Connecticut, each raw milk container that is not pasteurized and is offered for retail sale must bear a label that conspicuously and legibly bears the exact language below in letters no less than 1/8 inch in height and be of a color that contrasts with the rest of the label:

Raw milk is not pasteurized; pasteurization destroys organisms that may be harmful to human health.

Licenses
The following licenses are required in the state of Connecticut:

Retail Raw Milk, Raw Milk Cheese Mfg
If you produce, retail raw milk and/or manufacture raw milk cheese

Milk Dealer License
If you want to process or distribute milk, yogurt, egg nog, cheese, and dry milk

Cheese Manufacturer
If you pasteurize milk and manufacture cheese

Milk, Distributor
If you want to distribute (only) fluid milk and/or yogurt

Milk, Retail Store License
If you sell fluid milk and milk products at retail

Cheeses
Fresh (un-aged) and soft and semi-soft cheeses must be maintained at a temperature below 40°F. and must be made from pasteurized milk. Any cheeses produced from raw
milk must be aged for a minimum of 60 days and maintained at a temperature less than 45°F. Proper labeling for all cheeses is required.

**Milk, Soft and Semi Soft Cheese**

C.G.S. § 22-194 applies to fluid milk and milk products such as milk, flavored milk, cream, sour cream and yogurt, these products must be maintained at a temperature below 40°F to retard the growth of spoilage bacteria and in the case of Retail Raw Milk this temperature will also retard the growth of most pathogens. Soft spreadable cheese and semi-soft cheese are manufactured from pasteurized milk, sold as a fresh product and must be stored at the temperatures prescribed in the Food Code (below 45°F). Any ice used to maintain refrigeration temperatures must be made from potable water. Care must be taken not to contaminate the pouring lip of containers. Coolers must be cleaned and disinfected before each use. It is critical that these temperatures be maintained through warehousing, distribution, delivery, handling and storage. Consumers should be advised to refrigerate milk promptly after purchase and each use. Properly refrigerated, milk should last 3-5 days beyond the sell date. Refrigeration is the single most important factor in maintaining the quality of dairy products.

**Aged and Hard Cheeses**

These cheeses are characterized by their moisture content, texture, pH, water activity and aging. The relative safety of these cheeses at certain temperatures and their storage requirements vary considerably based on these characteristics. All cheeses are required to be maintained at 45°F or below, unless approved by the local health department based on adequate laboratory data submitted to the health authority for review. Long term storage of these products such as overnight storage must comply with the Food Code (below 45°F) as well as cheese lacking the documentation cited above. Per the Code of Federal Regulations and R.C.S.A. § 22-133-128 any cheese manufactured from unpasteurized milk must be aged for a minimum of 60 days before being offered for sale. Proper labeling for all cheeses is required. Consumers should be advised as to the best handling and storage practices for each type of cheese.

**Frozen desserts**

Anyone manufacturing frozen desserts for wholesale or retail sale must be licensed by the Department of Consumer Protection. Examples of frozen desserts are soft serve ice cream, batch made ice cream, shakes, and popsicles.

For more information concerning dairy products (other than frozen desserts) contact the following:

Department of Agriculture  
Bureau of Inspection and Regulation – Dairy Division  
165 Capitol Avenue, G8A  
Hartford, CT 06106  
(860) 713-2508
Shellfish Requirements

Inspection and regulations concerning shellfish
Shellfish under this guideline includes only raw fresh or frozen molluscan shellfish (clams, mussels, oysters and whole or roe-on scallops.

Approved shellfish sources
All shellfish must be from an approved source. An approved source is defined as a shellfish harvester or dealer licensed by the state control authority and is listed in the US Food and Drug Administration (FDA) Certified Shellfish Shippers List which is accessible online at www.cfsan.fda.gov/~ear/shellfis.html.

The Connecticut Department of Agriculture (CT DOA) is the Connecticut shellfish control authority and licenses all commercial shellfish harvesters and dealers in accordance with the National Shellfish Sanitation Program Model Ordinance. Only retail food stores that sell shellfish directly to the consumer are not required to be licensed by the CT DOA. Retail food stores are required to be licensed if they sell wholesale or sell to a party that is not the ultimate consumer of the product. All retail food stores are regulated by the Connecticut Department of Consumer Protection, Connecticut Department of Public Health and local health departments.

Food service establishments are not allowed to purchase shellfish if the vendor is not licensed by the CT DOA and is not listed in the US FDA Certified Shellfish Shipper’s list. A certified shellfish shipper licensed by the CT DOA that is a vendor at a farmers’ market that sells to a food service establishment must provide the restaurant with the shellfish shipping tag and an invoice that indicates the source and date of purchase.

Tags/labeling
All shellfish must be identified with a shellfish shipping tag that contains the name, address and certificate number of the shellfish shipper. It must also contain the original shipper’s certificate number if shellfish were harvested by a dealer other than the one noted above. The date of harvest, shipping date, harvest location, type of shellfish and quantity of shellfish must also be indicated on the tag. Shellfish shipping tags must be attached to every shellfish container purchased and remain on that container until it is emptied and then retained for 90 days. If sold to a restaurant the tag must not be removed.

A sign must be prominently displayed informing the consumer of the country of origin of the shellfish and if the product is farm raised or wild. It must also provide a health disclosure that is noted on the shellfish tag.

Temperature control
All molluscan shellfish must be received, transported and stored in equipment that maintains an ambient air temperature of 45 °F. or less. Shellfish must be displayed under temperature controls of 45 °F. or less. Accurate thermometers must be provided to periodically check temperatures of the holding equipment.
Water source
An adequate supply of potable water must be available for cleaning and sanitizing equipment, utensils and food contact surfaces. If a permanent potable water supply cannot be provided, the local director of health may approve an alternate temporary potable water supply or require that approved commercially bottled drinking water be used.

Shellfish storage and display
Shellfish shall be properly stored and displayed in manner protected from contamination and adulteration. Shellfish may not be stored in stagnant water, in close proximity to raw fish or raw meat or on the ground/floor. When stored on ice, the ice shall be well drained.

The ice shall be made from water that comes from an approved source; and shall be used only if it has been manufactured, stored, transported and handled in a sanitary manner. Handled scoops and containers shall be used and sanitized prior to use.

Hand washing/personal hygiene
All employees must wash their hands in an approved hand wash station based on the requirements explained in Chapter 11.

Employees or other food workers with communicable diseases that can be transmitted through food must be excluded from all food handling activities.

The local director of health must be notified by the vendor if any food workers are, or have been ill with vomiting and/or diarrhea or another illness transmissible thorough food.

A hand washing station with warm running potable water in a vendor’s booth is not required if all shellfish are sold in the shell and sold by the bag or dispensed by using a handled scoop.

Please reference the Compliance Guide for Temporary Foodservice Events issued by the State of Connecticut Department of Public Health dated 8/1/2008 for additional information and requirements. This is available at the Connecticut Department of Public Health or your local health department.

Anyone wishing to sell finfish at a Connecticut farmers’ market must have the appropriate commercial fishing license from the Connecticut Department of Environmental Protection (CT DEP) and/or Federal permits issued by the National Marine Fisheries Service.

The following is a list of the specific licenses issued by the CT DEP that may be required depending upon the operation:

- Commercial Blue Crab License
- Commercial Horseshoe Crab License
- Commercial Landing License
- Seafood Dealer’s License
- Commercial Fishing License
- Commercial Lobster Pot License
- Commercial Finfish License

Please refer to the CT DEP Marine Fisheries Manual (http://www.ct.gov/dep/lib/dep/fishing/saltwater/marinecirc.pdf). This manual is provided to inform commercial and recreational fishermen about Connecticut statutes and regulations that govern the taking of lobsters, marine and anadromous finfish, squid and crabs.

Federal permits are required to fish for, harvest and possess fish in federally regulated waters. These permits are:

- Federal Vessel Permit
- Federal Dealer Permit

For information pertaining to molluscan shellfisheries (oysters, clams, bay scallops and conch), see Chapter 18: Shellfish of this manual or contact the Department of Agriculture’s Bureau of Aquaculture.

You must also check with your local health department as to specific requirement regarding set up and sales at the farmers’ market.

For more information please contact:
Connecticut Department of Environmental Protection
Marine Fisheries Division
PO Box 719
Old Lyme, CT 06371

Honey Requirements

Registration
Hives in Connecticut must be registered with and inspected by the Connecticut Agricultural Experiment Station (Connecticut General Statutes Sections 22-89 through 22-90, inclusive).

The apiary inspection and registration program is designed to prevent the introduction or establishment of honey bee diseases, parasites or undesirable races of honey bees. Apiary inspection is the only way to accurately assess the health of the bee colony. The owners of beehives containing live honey bees that are located within Connecticut must register the location of the beehives with the Office of the State Entomologist each year on or before October first. To comply with the requirements, write to:

Office of the State Entomologist
Connecticut Agricultural Experiment Station
P. O. Box 1106
New Haven, CT 06504-1106

or

call (203) 974-8479 during any weekday between the hours of 8:30 a.m. 4:30 p.m.

There is no fee for registration or inspection. The Department of Consumer Protection, Foods and Standards Division will conduct an inspection for labeling purposes, upon request.

Product labeling
Honey sold in Connecticut must be labeled with the following information:
- Common name in bold letters, (e.g.: HONEY)
- Net quantity in both English and metric—descriptive terms such as “Approximate” or “Full ounce” are not allowed
- Declaration of responsibility (manufacturer or packager name and address)
- Content statement (if any additional ingredients have been added).

For further information or label review contact:
Department of Consumer Protection
Division of Food and Standards
165 Capitol Avenue
Hartford, CT 06106
Phone: (860) 713-6160
Fax: (860) 713-7237

Eggs Requirements

Marketing and minimum labeling requirements
Producers selling shell eggs of their own producing at farm stands, farmers’ markets or direct to household users are exempt from having to grade and size shell eggs and are not required to put a net weight on the carton. Shell eggs must be labeled with the name and address of producer or distributor, and grade or size, if applicable. New cartons naturally present a stronger marketing advantage. However, if used cartons are employed, they must comply with the following:

- USDA shield must be obliterated
- Original plant code, expiration/sell by date must be obliterated
- Original trade name/address must be obliterated
- The name and address of the current producer or distributor and a phone number to receive complaints must be included on the carton and clearly legible
- Safe handling statement must be legible

The surface of the egg should be cleaned in an approved manner; that will remove dirt and debris without damaging the egg’s natural coating.

Eggs not subject to USDA inspection and regulation cannot be sold to other retail establishments or food service establishments.

Sizing and grading
Eggs cannot be sold as graded eggs or sized eggs unless those eggs originate from a USDA or state inspected grading facility using USDA grading and sizing guidelines.

Handling
Shell eggs must be kept in a cooler or refrigerated enclosure that is maintained at a temperature at or below 45 degrees Fahrenheit.

The Food and Drug Administration (FDA) published a final rule in the Federal Register of December 5, 2000 (65 FR 76092) entitled, "Food Labeling, Safe Handling Statements, Labeling of Shell Eggs; Refrigeration of Shell Eggs Held for Retail Distribution." The final rule applies to shell eggs that have not been specifically processed to destroy all live *Salmonella* before distribution to the consumer. For these shell eggs, packers must include a safe handling statement on the carton. This statement must appear on the label prominently, conspicuously, and in a type size no smaller than one-sixteenth of one inch. The statement must appear in a hairline box and the words "safe handling instructions" must appear in bold capital letters (see next page).

SAFE HANDLING INSTRUCTIONS: To prevent illness from bacteria: keep eggs refrigerated, cook eggs until yolks are firm, and cook foods containing eggs thoroughly.
For further information on the safe handling of eggs:

Questions regarding the sale of eggs at retail or wholesale should be directed to:

Cider and Juices (Unpasteurized) Requirements

Packaged or bottled raw (unpasteurized) cider and juices of all types may only be sold at retail in accordance with state and federal laws and must bear the federal warning label. The statement must appear on the label prominently, conspicuously and must appear in a minimum type size of one-sixteenth inch. The statement must appear on the label prominently, conspicuously, and must appear in a minimum type size of one-sixteenth inch. The statement must appear in a box set off by hairlines. The word "warning" must appear in bold capital letters.

**WARNING:** This product has not been pasteurized and, therefore, may contain harmful bacteria that may cause serious illness in children, the elderly, and persons with weakened immune systems.

Unpasteurized cider and juices may not be sold to other retail or to food service establishments.

Please be advised that if you plan to allow the public to sample unpasteurized cider or unpasteurized juices that have not yet been bottled and have been prepared for immediate consumption, you are subject to the provisions of the Connecticut Public Health Code, Section 19-13-B42. If a vendor chooses to sample these items, they are strongly encouraged to include a notice to the public warning them that the product is unpasteurized and may potentially contain harmful bacteria that could cause serious illness in children, the elderly and persons with weakened immune systems.

Producers of cider must annually register with the Department of Consumer Protection, as inspection of the production area is required in order to obtain a license to sell cider.

Inspection and Regulations Concerning Apple Juice and Cider License

Requirements For Items Exempt From Inspection

It is important to note, that generally, no food products may be made in a facility that is also used for residential use. However, in Connecticut, jams, jellies, preserves and maple syrup are exempt from a sanitation inspection of the processing facility when preparation and sale of these items occurs on a residential farm. These products still need to be labeled with the following in ten-point type:

- Common or usual name
- Ingredients in descending order by predominance by weight
- Declaration of responsibility (name and address of manufacturer or distributor)
- Net weight or volume expressed in metric and English units
- A content statement if any additional ingredient has been added.

Jams, jellies, preserves and maple syrup labels must also bear the following statement:

“Not prepared in a government inspected kitchen”

Jams, Jellies and Preserves
The following is the current language of Connecticut General Statutes regarding jams, jellies and preserves:

Sec. 21a-24a. Sale of jams, jellies and preserves. (a) As used in this section:
(1) "Jam" means a food, with a pH value of 4.6 or less, made by cooking fruit with sugar to a thick mixture.
(2) "Jelly" means a food, with a pH value of 4.6 or less, made by cooking fruit juice that has been boiled with sugar.
(3) "Preserves" means a food, with a pH value of 4.6 or less, consisting of fruit preserved whole by cooking with sugar.
(4) "Residential farm" means property (A) being utilized as a farm, as defined in subsection (q) of section 1-1, and (B) serving as the primary residence of the owner of such property.

(b) Notwithstanding the provisions of sections 21a-91 to 21a-120, inclusive, and section 19-13-B40 of the regulations of Connecticut state agencies, the preparation and sale of jams, jellies or preserves on a residential farm shall be allowed in a room used as living quarters and exempt from inspection by any state or local agency, provided such jams, jellies or preserves are prepared with fruit grown on such farm. Each container of jam, jelly or preserves offered for sale on such farm shall have on its label, in ten-point type: "Not prepared in a government inspected kitchen".

Maple Syrup
Maple syrup may be produced on a “residential farm” or a maple sugarhouse. This exemption does not include processed foods made with maple syrup. Maple producers and retailers must label maple syrup with the following:

- Common or usual name
- Name and address of manufacturer or distributor
- Net weight or volume expressed in metric and English units.
The label must also contain, in ten-point type, the following:

“Not prepared in a government-inspected kitchen.”

Inspection by the Department of Consumer Protection is conducted on an “upon request” basis.

The following is the current language of Connecticut state law regarding maple syrup:

**Sec. 21a-24b. Sale of maple syrup.** (a) As used in this section, "residential farm" means property (1) being utilized as a farm, as defined in subsection (q) of section 1-1, and (2) serving as the primary residence of the owner of such property.

(b) Notwithstanding the provisions of sections 21a-91 to 21a-120, inclusive, and any regulations adopted thereunder, the preparation and sale of maple syrup on a residential farm shall be allowed in a room used as living quarters and shall be exempt from inspection by any state or local agency. Each container of maple syrup offered for sale on such farm shall have on its label, in ten-point type: "Not prepared in a government-inspected kitchen."

The above exempted products may only be sold directly to consumers at the residential farm producing the products or at the farmers’ market kiosk at a certified farmers’ market. The exempted products may not be distributed wholesale or sold to food service establishments including hotels, restaurants and institutions.

Questions regarding the sale of jams, jellies, and preserves, or the sale of maple syrup at retail or wholesale should be directed to:

Frank Greene, Division Director
Connecticut Department of Consumer Protection
Division of Food and Standards
Phone: (860) 713-6160
Fax: (860) 713-7237
Frank.Greene@po.state.ct.us

Last edit 3/20/2009
Information Regarding Producing and Selling of Organic Products

The United States Department of Agriculture accredits state, private and foreign organizations or persons to become “certifying agents.” Certifying agents certify that organic production and handling practices meet the national standards.

Who needs to be certified?
Operations or portions of operations that produce or handle agricultural products that are intended to be sold, labeled, or represented as “100% organic”, “organic,” or “made with organic ingredients” or food group(s).

Who does not need to be certified?
Producers and handling (processing) operations that sell less than $5,000 a year in organic agricultural products do not need to go through the certification process. Although exempt from certification, these producers and handlers must abide by the national standards for organic products and may label their products as organic.

How do farmers and handlers become certified?
An applicant must submit specific information to an accredited certifying agent. Information must include:
- The type of operation to be certified;
- A history of substances applied to the land for the previous 3 years;
- The organic products being grown, raised, or processed;
- The organic system plan (OSP) – a plan describing practices and substances used in production. The OSP also must describe monitoring practices to be performed to verify that the plan is effectively implemented, a record-keeping system, and practices to prevent commingling of organic and non-organic products and to prevent contact of products with prohibited substances.

Applicants for certification must keep accurate post-certification records for 5 years concerning the production, harvesting, and handling of agricultural products that are to be sold as organic.

These records must document that the operation is in compliance with the regulations and verify that information provided to the certifying agent. Access to these records must be provided to authorized representatives of USDA, including the certifying agent.

USDA Accredited certifier list (USDA/NOP)
The list of accredited certifiers is available at www.ams.usda.gov/nop
The majority of Connecticut Organic Farmers use Bay State Organic Certifier, located in Winchendon, MA.
Phone: (978)297-4171
Email: baystateorganic@earthlink.net
Inspection and certification process
Certifying agents review applications for certification eligibility. A qualified inspector conducts an on-site inspection of the applicant’s operation. Inspections are scheduled when the inspector can observe the practices used to produce or handle organic products and talk to someone knowledgeable about the operation.

The certifying agents reviews the information submitted by the applicant and the inspectors report. If the information demonstrates that the applicant is complying with the relevant standards and requirements, the certifying agent grants certification and issues a certificate. Certification remains in effect until terminated, either voluntarily or through the enforcement process.

Annual inspections are conducted of each certified operation, and updates of information are provided annually to the certifying agent in advance of conducting these inspections. Certifying agents must be notified by a producer or handler immediately of any changes affecting an operation’s compliance with the regulations, such as application of a prohibited pesticide to a field.

Compliance review and enforcement measures
The regulation permits USDA or the certifying agent to conduct unannounced inspections at any time to adequately enforce the regulations. Certifying agents and USDA may also conduct pre- or post harvest testing if there is reason to believe that an agricultural input or product has come into contact with a prohibited substance or been produced using an excluded method.

Cost-Share Grant Program
The Connecticut Department of Agriculture offers a cost share grant from USDA. This grant allows certified organic growers to receive reimbursement of 70% or up to $500 for the cost of certifying their farm.

For further information contact the Connecticut Department of Agriculture:
Rick Macsuga         Mark Zotti
(860) 713-2544       (860) 713-2538

Last edited 11/12/08
Setting market prices is a challenge every vendor faces. Pricing should be based on total costs of production, transportation and marketing.

*Price fixing is illegal and farmers/vendors cannot overtly conspire to set price.*

Department of Agriculture representatives frequently visit the markets and keep track of prices and make them available through a weekly email to assist vendors in knowing what average prices are.

For further information contact the Connecticut Department of Agriculture:
Rick Macsuga       Mark Zotti
(860) 713-2544     (860) 713-2538

**Electronic Benefits Transfer (EBT)**

EBT is part of the SNAP – Supplemental Nutrition Assistance Program, formally known as Food Stamps. In order to become an Electronic Benefits Transfer (EBT)/SNAP approved farmers’ market, call the United States Department of Agriculture (USDA), Food and Nutrition Services (FNS) Application line at 1-877-823-4369.

Once authorized, decide on technology to process transactions. Possible options include:

- FREE EBT only Point of Sale (POS) machine from EBT vendor – requires a phone line and electricity
- Wireless device – can be expensive, but most versatile and can also accept Credit and Debit transactions
- Paper Vouchers – most cumbersome, requires a phone call authorization

Also, wooden tokens can be obtained from Connecticut’s Department of Agriculture and utilized at farmers’ markets for this program.

**Process at the Market**

The Market Master (MM) or their designee processes transactions upon the request of an EBT client and hands out wooden tokens. The transaction is processed either by swiping the EBT card and having the client enter their PIN or filling out the paper voucher and placing a phone call to “hold” the funds:

EBT clients can spend their wooden tokens only on food stamp approved items. Individual farmers collect wooden tokens throughout the market day. At the end of the day, they turn the wooden tokens over to the MM. Arrangements are made to pay the individual farmer by the MM.

The MM receives payment/settlement from EBT the vendor electronically, usually the next day. If paper vouchers are used, the MM must “clear” the vouchers electronically via an EBT only machine within 15 calendar days. This can be done at a location other than the market, as electricity and a phone line are required.

**EXEMPT SALES OF MEALS AND FOOD ITEMS**

The following are among the circumstances under which sales of meals and food items are exempt from sales and use taxes:

- Sales of items purchased with federal food stamps; Conn. Gen. Stat. §12-412(57) and §12-412e.

Other items are also eligible but not relevant to farmers’ markets.
EBT Eligible Foods

Eligible Items
- Fruits and Vegetables
- Breads and Cereals
- Meats, Fish, and Poultry
- Dairy Products

NON Eligible Items
- Beer, Wine, Liquor, Cigarettes or Tobacco
- Any Nonfood Items, such as:
  - Pet Foods
  - Soaps, Paper Products
  - Household Supplies
- Vitamins and Medicines
- Ready to Eat Foods or Food Eaten in the Store/Market
- Hot Foods

For further information on accepting Electronic Balance Transfers, please contact the Connecticut Department of Social Services:
Kristin Krawetzky, EBT Supervisor
Phone: (860)424-5756
Kristin.krawetzky@ct.gov

Last edited 2/3/2010
Ch. 27: Units of Sales and Scales

Units of Sale and Scales

Units of sale
Pricing at farmers’ markets is done in a variety of ways. Vendors sell their product by:

By the piece, bunch, head, etc.
For example:
- Apples, 2/$1.00
- Radishes, $1.50/bunch
- Lettuce, $2.00/head

By the container with size clearly marked
For example:
- Blueberries, $4.00/pint

By weight from a certified scale
For example:
- Tomatoes, $3.00/lb.

Scales
Scales must be for legal trade and made for commercial use. A legal-for-trade scale will be marked with:
- Serial Number
- Model Number
- Class III designation on the identification plate or seal

All scales must have an NTEP (National Type Evaluation Program) certificate of conformance. The scales must have been manufactured after July 1, 2003 to have this certificate.

Scales suitable for farmers’ markets will have ½ ounce or smaller or .01 pound or small increment.

Scales marked “Not Legal for Trade” are not acceptable. Baby scales or kitchen scales are two types of scales that are not legal.

There is no problem with hanging scales as long as they meet all of the criteria. There are some hanging scales that do not meet these criteria, so get the assurance from the vendor in writing. The face of the scale should state that the spring is temperature compensated.

It is the responsibility of the scale owner to have the device inspected and to maintain the accuracy of the scale. Scales should be inspected annually. Some growers report increased sales by using digital scales. With these scales they get an exact price instead
of rounding down the price to the closest weight. This technology can prevent “nickel and dime” losses.

To have your scale certified or for more information contact:
Connecticut Department of Consumer Protection
Food and Standards Division
165 Capitol Avenue
Hartford, CT 06106

Phone: (860) 713-6160

Last edited 11/12/08
Suggested Insurance Coverage

No business should operate without the proper insurance. The right coverage provides protection for both the business owner and the customer. In today’s litigious society no one should gamble with their livelihood. There are two types of insurance purchased by farmers’ markets and/or farmers’ market vendors – overall liability (slip and fall) and product liability. Below is a basic description of the two types:

Liability
Liability insurance covers the market for accidents that may occur at the market during business hours, such as customer falls and injuries.

Product Liability
Product liability policies cover the individual vendors from liability from the products they have sold.

If someone becomes ill due to your product or slips and falls due to your negligence, you must have the proper coverage to protect yourself. Any farm, regardless of size, is a business. Whether products produced on the farm are sold at a roadside stand or at a local farmer’s market, insurance should be considered a standard part of the cost of doing business.

If you have a homeowner policy now, it can be converted to a farm owner policy. Unless endorsed, be aware that homeowner policies exclude liability for businesses, such as farming, even if incidental. Farm insurance rates are very competitive with homeowner rates. You would have everything that you currently have with the homeowner policy plus you would have farm and product liability.

Virtually all of Connecticut’s Farmer’s Markets now require that all market participants provide a certificate of insurance showing that a minimum liability limit of $300,000 is in place. Insurance is frequently a large expense. Markets are encouraged to fully understand the policy they are purchasing and shop around for the best coverage and rates. The kind of policy your market should purchase and how much coverage you need should be discussed with an insurance professional.

The individual market should be listed on the certificate. Certificates are provided by your farm insurance agent at no cost.

Be properly covered, your farm could depend on it.

Market Types

All Certified Connecticut Farmers’ Markets must have two or more farmers selling Connecticut-grown fresh produce per Section 22-6r of the Connecticut General Statutes (see Chapter 4). This is not to be confused with farm stands, roadside markets, or flea markets.

There are two different types of certified farmers’ markets:

Producer Only and Exempt

Producer only is a market where farmers/vendors can only bring what they produce.

Exempt markets are markets where farmers/vendors do not produce all commodities and/or supply does not meet demand. Therefore certain products are deemed exempt products and any and all vendors at that market may purchase these products from another Connecticut farmer and resell them at the market.

For example, if there is a shortage of berry producers available to participate in farmers’ markets, an application can be filled out and, if accepted, the farmers will be permitted to purchase Connecticut Grown berries to be sold at the market.

At these markets, the farmers/vendors must be in agreement, fill out an Exempt Application, and return it to the Connecticut Department of Agriculture prior to the start of the market. Anything purchased and brought to the market must be Connecticut Grown.

Farmers/vendors may also be required to provide the Department of Agriculture with valid receipts of all exempt produce being sold if a place of origin is ever in question.

Connecticut Department of Agriculture reserves the right to perform growing area verifications on all farmers that submit a signed crop plan clearly stating all the crops that they grow. Verifications are initially done when a farmer first begins to participate in a farmers’ markets. If complaints are received, crop verifications may be performed by a Department of Agriculture representative.

Please note advertising of non-Connecticut Grown products for sale as Connecticut Grown products carries a fine up of up to $1000 per commodity.

Non-Farming Vendors:

Many non-farming vendors have found success at Connecticut Farmers’ Markets. The amount and types of non-farming vendors is a market decision. Some markets discourage the participation of any non-farming vendors while others will only allow a small number. Any products sold by non-farming vendors should originate from
Connecticut. CT Farmers’ Markets were developed to promote and sustain Connecticut farmers. They are expected to remain farmers’ markets and not to be confused with flea markets that also sell fruits and vegetables. The CT Department of Agriculture reserves the right to discontinue ties with any flea market that misrepresents itself as a farmers’ market.

For further information contact the Connecticut Department of Agriculture:
Rick Macsuga       Mark Zotti

Crop Plans and Specialty Crop Plans

Market Masters and the Connecticut Department of Agriculture should have a copy of crop plans from all farmers/vendors participating in each farmers’ market. Many local health departments will also request a copy of the crop/specialty crop plans. The crop plan and specialty crop plan serve a variety of purposes. We recommend that they be filled out clearly and accurately. This is especially important to any vendors participating in Producer Only markets. Any changes in the crop plans from year to year should be verified with both the market master and the Connecticut Department of Agriculture.
